Inventory						
New Additions						
Culls and Deaths (previous 12 months)						

How do you obtain replacements? (home raised, market, single owner)

Area of operation responsible for the major source or risk and/or spread of Johne's

CHECK ALL BOXES THAT APPLY

Calving Area:
- ☐ Use individual calving pens that are cleaned after each use.
- ☐ Keep calving area clean and dry.
- ☐ Keep adult cow manure away from calves.
- ☐ Do not use calving pens for sick cows or cows that are JD test positive.
- ☐ Remove cow-calf pair from calving area immediately after calves are born.
- ☐ Adequate square feet / pair.
- ☐ Collect colostrum under sanitary conditions.

Pre-weaned Calves:
- ☐ Access to fresh water vs. stockdam / water hole / slough.
- ☐ Sick animals segregated from healthy ones.
- ☐ Feeding areas clean.
- ☐ Prevent contact with cows that are JD test positive.
- ☐ Provide adequate pasture space.
- ☐ Prevent manure contamination of feed storage.

Weaned calves and bred heifers:
- ☐ Minimize contact with adult cows or cow manure.
- ☐ Remove cow manure from all equipment before using in heifer areas.
- ☐ Heifers obtained from known source.
- ☐ Do not allow heifers to share water, feed, housing, feed bunks or pasture with cows.
- ☐ Prevent heifers from grazing / consuming feed with manure spread on in the past 12 months.

Adult cows and bulls:
- ☐ Avoid spreading manure on hay ground or pasture.
- ☐ Avoid manure contamination of feed storage areas or feeding equipment.
- ☐ Isolate or cull cows that are JD test positive.

Replacements:
- ☐ Management herds - Purchase replacements from herds with known negative JD status.
- ☐ Status herds - Purchase replacements according to guidelines for negative Status Herds.
