

# North Dakota 2014 EAS TEST SCHEDULE

This is the 2014 schedule for the North Dakota monthly EAS tests. North Dakota State Radio will be broadcasting on frequency **(154.935MHz)** all across the state. LP-1 stations are required to monitor this frequency. All others are encouraged to do so. "All of North Dakota" must be in your location file in order to receive messages from them.

Upon reception of a monthly test you have 60 minutes to re-transmit the alert. The monthly test is scheduled for the first Wednesday of each month. Odd months are during the daylight hours. Even months are at night. If the first Wednesday falls on a holiday, the test will be held on the second Wednesday of the month. ***If the local PSAP is unable to initiate a local monthly test, the local primary station should do it.***

**If there are technical problems with a monthly test, it should be sent again the following week same day and time period.**
