

DENTAL POLICY GUIDELINE

Effective: 1/1/2012

Preventative Resin Restoration in a moderate to high caries risk patient – permanent tooth

CDT CODE: D1352

Conservative restoration of an active cavitated lesion in a pit or fissure that does not extend into dentin; includes placement of a sealant in any radiating non-carious fissures or pits.

Preventative Resin Restoration

- Must be a conservative restoration using a bur that extends into enamel only and includes all the deep grooves of the tooth.
- Must be placed on a non-restored permanent tooth that has not had a sealant placed within 1 year.
- No local anesthetic will be covered for this procedure
- No prior authorization is needed.
- Reimbursed for eligible ND Medicaid recipients through age 20.
