AUDIOLOGY

The audiometric tests listed above imply the use of calibrated electronic equipment. Other hearing tests (such as whispered voice, tuning fork) are considered part of the general otorhinolaryngologic services and are not reported separately.

*All descriptors refer to testing **both ears**. Use modifier –52 if a test is applied to one ear instead of two ears.

All descriptors (except 92559) apply to testing of individuals; for testing of groups, use 92559 and specify test(s) used.
