05054	Case reevaluation	H1001	Prenatal care, at-risk enhanced service; <u>antepartum management</u>
		H1004	Prenatal care, at-risk enhanced service; <u>follow-up home visit</u>

** Services rendered and billed to NDMA as Targeted Case Management for High Risk Pregnancy must be face-to-face services with the patient/recipient.

** Providers must have documentation that identifies the date and time a service was delivered, the number of minutes of service provided and the type of case management service that was provided to a recipient. If more than one type of case management service was delivered in a 15-minute period, bill for the service for which the most time was expended. EXAMPLE: You spent 9 minutes on a antepartum management (H1001) and 6 minutes on education (H1003), you would **bill** one (1) unit for **antepartum management (H1001)**.
