

Mozilla Firefox: Instructions for Adjusting Settings for Opening PDF Form's

1. Open the menu by clicking on the three horizontal lines in the upper right corner of the webpage.

2. From the menu list, select "Options".

3. Scroll down to "Files and Applications"

4. Under Downloads, select Save files to, then click Browse and select Desktop

5. Under "Applications", click on "Portable Document Form (PDF)". Change the option to "Use Adobe Acrobat Reader" by clicking the downward facing arrow.
NOTE: If Adobe Acrobat Reader DC does not appear in the list, click "Options" and select it from there.

6. The form will open as a PDF document in a separate window.
