

Coding Guideline for Intramuscular or Subcutaneous Injections

CPT® Code: 96372

Therapeutic, prophylactic, or diagnostic injection (specify substance or drug);
subcutaneous or intramuscular

Criteria for Reimbursement:

Effective for Dates of Service 10/01/2016 forward reimbursement will be allowed for CPT® 96372 when the injection is performed alone, or in conjunction with other procedures/services as allowed by NCCI Procedure To Procedure editing. Separate reimbursement will not be allowed for CPT® 96372 when billed in conjunction with an Evaluation and Management Service (CPT® 99201-99499) by the same rendering provider on the same date of service. If a patient supplied medication is being administered, the name of the medication along with the dosage must be entered on the CMS 1500 Box 19 or the equivalent loop and segment of the 837P.
