Project Name* PUBLIC USE FISHING DOCKS @ LAKE METIGOSHE AND BEAVER LAKE STATE PARKS

Abstract/Executive Summary. An Executive Summary of the project stating its objectives, expected results, duration, total project costs and participants.* (no more than 500 words)

Fishing/ Lake Access Enhancement at Beaver Lake State Park and Lake Metigoshe State Park

Fishing is one of the outdoor recreational experiences offered at most state parks located on the lakes or rivers of North Dakota. Although there are many areas suited for shoreline fishing, there are other areas where access is less than desirable.

In 2008, Beaver Lake State Park installed a floating fishing dock to provide better access for people fishing from shore. Needless to say, the dock was an instant hit. The docks enabled people without boats the opportunity to fish from a platform an extra 30 feet from shore and in water that is several feet deeper. Tie down cleats were not installed on the dock to discourage boaters from trying to tie to the dock as is to be used for fishing only. Many visitors have asked when more fishing docks would be installed as shoreline fishing at Beaver Lake is somewhat limited. One of the main comments on what people would like to see to improve the fishing dock is, the dock should be bigger with more usable fishing area. Most of the people fishing bring their own folding chairs to sit on while fishing from the dock, but adding sitting benches on the dock would be a welcome addition.

A new dock configuration for two fishing docks is proposed. The new configuration would be a "T" dock instead of the current "L" configuration. The dimensions of the main spine of the dock will be approximately 45' in length and 6' wide. The top of the "T" would consist of two 20' arms, each with a bench for seating. The anchor system would consist of six screw in pipes and anchor brackets to attach to the dock. During water fluctuations or wave action, the dock self-levels as it is free to slide up and down each of the anchor pipes. A walkway from the dock to the shore would also be required.

Two complete dock systems would be needed, one for Beaver Lake State Park near Wishek and one for Lake Metigoshe State Park near Bottineau. The complete dock system for Lake Metigoshe State Park, including shipping from Beaver Lake, will cost \$19,471.41. The complete dock system for Beaver Lake State Park, including shipping, will cost \$20,721.71. Attached, please find a diagrams of the dock configurations and a price quotes including freight to each of the proposed locations.

An additional \$9,649.47 is requested to augment the existing fishing dock at Beaver Lake State Park. The existing fishing dock is extremely popular and will augment fishing enjoyment by adding the following components to the system.

- 4 - dock sections - \$6388.80
- 16 – coupler sets - \$689.92
- 2 – bench seats - \$776.00
- 2 – corner gussets - \$410.00
- 2 – anchor brackets - \$522
- 4 –auger tips - \$95.00
- Shipping - \$767.75

A price quote in the amount of \$9649.47 for the dock upgrade has been attached. If all portions of the proposal are approved, a total of \$49,842.59 for materials would be needed to complete the project.
