

## North Dakota Renewable Energy Program Status Report

Recipient: eSmart Systems US, Inc.

Contract Number: R-038-048

Report for time period of: Dec 18, 2018 – Feb 28, 2019

### Description of Project

Please provide a brief description of the project:

The Fargo Smart Energy Ramp Project is designed to combine renewable energy with digital intelligence to maximize the value of renewable energy. In particular, the City of Fargo has a parking ramp at the Roberts Commons mixed use space where photovoltaics are supplying renewable energy that is being used with intelligent control of battery storage, electric vehicle charging and other controls to reduce both electricity costs and carbon footprint.

### Project Tasks

Please describe the progress on all project tasks achieved during the reporting period:

The equipment was specified and a bid was received to meet the project objectives.

### Deliverables

Please describe the progress on project deliverables, as stated in your contract, achieved during the reporting period:

The equipment has been specified during this period and a bid received.

### Expenditures

Please provide a breakdown of expenditures. Include all sources of match. Provide supporting documentation as a separate attachment.
