This spectrum, with the exception of the Domestic Equity category, is based on Fidelity's analysis of the characteristics of the general investment categories and not on the actual investment options and their holdings, which can change frequently. Investment options in the Domestic Equity category are based the options' Morningstar categories (Large Value, Mid-Cap Value, Small Value, Large Blend, Mid-Cap Blend, Small Blend, Large Growth, Mid-Cap Growth, Small Growth) as of 12/31/01. Morningstar categories are based on a fund's style as measured by its underlying portfolio holdings over the past three years and may change at any time. These style calculations do not represent the investment options' objectives and do not predict the investment options' future styles. For more information on the investment options in the Domestic Equity category, visit [www.Morningstar.com](http://www.Morningstar.com). Investment options are listed in alphabetical order within each investment category. Risk associated with the investment options can vary significantly within each particular investment category, and the relative risk of categories may change under certain economic conditions.

If your plan offers Asset Manager funds please note, the portfolio manager of each of the Asset Manager funds has the flexibility to periodically shift investments between the three asset classes, depending on the current outlook for the various markets. The risk level of the Asset Manager fund(s) cannot be portrayed as a single point on the objective spectrum along with the other investment options because it can change periodically according to how the assets are invested.

If your plan offers Fidelity Freedom Funds® please note, the Fidelity Freedom Funds are not represented on the above spectrum because each fund (except Fidelity Freedom Income) will gradually adjust the asset allocation to be more conservative as the funds approach their target dates. The risk level of the Fidelity Freedom Funds cannot be portrayed as a single point on the objective spectrum along with the other investment options because they can change periodically according to how the assets are invested.

For a more complete discussion of risk associated with the mutual fund options, please read the prospectus before making your investment decision. The spectrum does not represent actual or implied performance.
