R-squared - This compares a fund's performance to a given index. If R-squared is 100, the fund moves in lockstep with the index to which it is being compared. Generally, a higher R-squared will indicate a more useful beta figure. If the R-squared is lower, then the beta is less relevant to the fund's performance.

Beta - This compares a fund's volatility to a given index. If beta is greater than 1, the fund is more volatile than the index to which it is being compared. If beta is lower than 1, the fund is less volatile than the index. If a fund's R-squared is low, beta is less reliable as a predictor of volatility.

Alpha - This is a measure of risk-adjusted performance. The higher a fund's alpha, the better it has done. A fund's alpha is only reliable when its R-squared is relatively high.

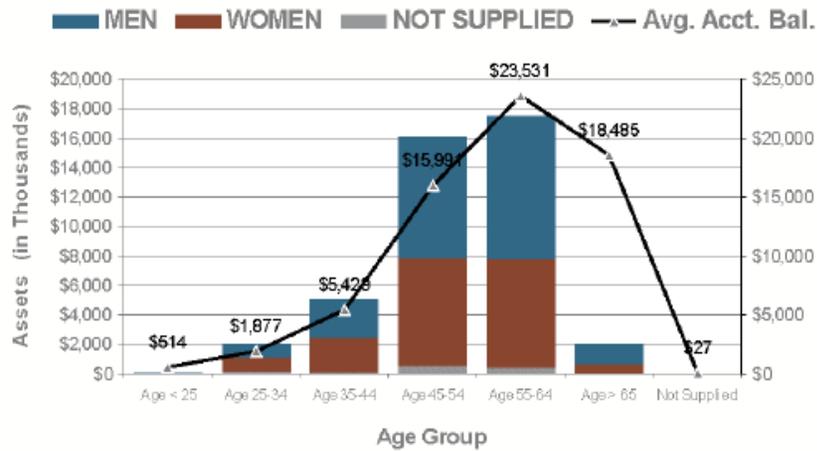

Standard Deviation - The higher this number is, the more volatile the fund's returns have been. It indicates how much the fund has deviated from its mean total return over the past three years.

Sharpe Ratio - This measure combines standard deviation and mean total return to show a risk-adjusted measure of the fund's performance. The higher this number is, the better. As a rule of thumb, a Sharpe ratio of more than 1.00 is very good.

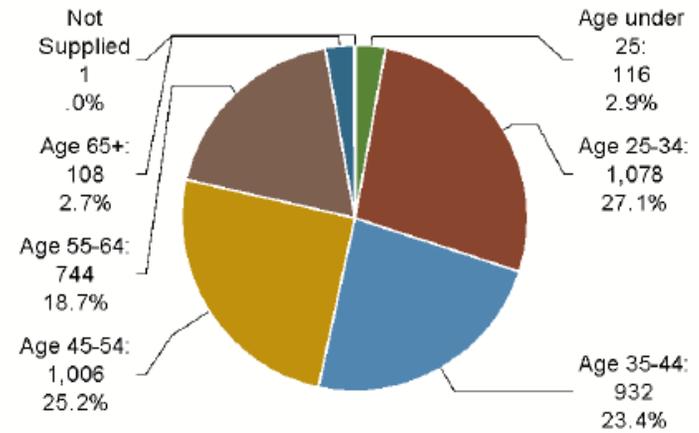

SUMMARY OF PLAN

DATA AS OF: 9/30/2012

Plan Assets - By Age and Gender

Participant Count - By Age

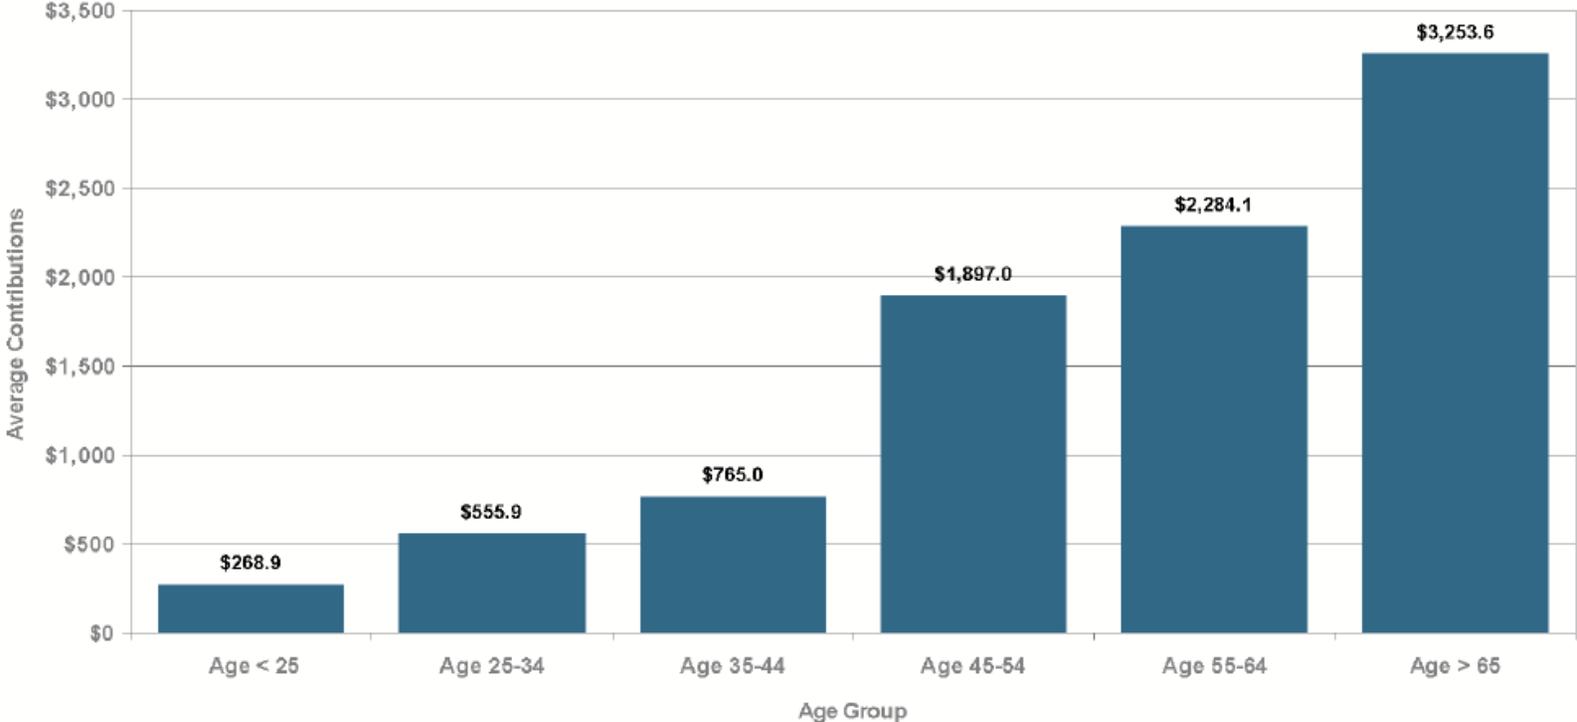

Total Participants: 3,985

CONTRIBUTIONS

BY AGE – AVERAGE CONTRIBUTIONS

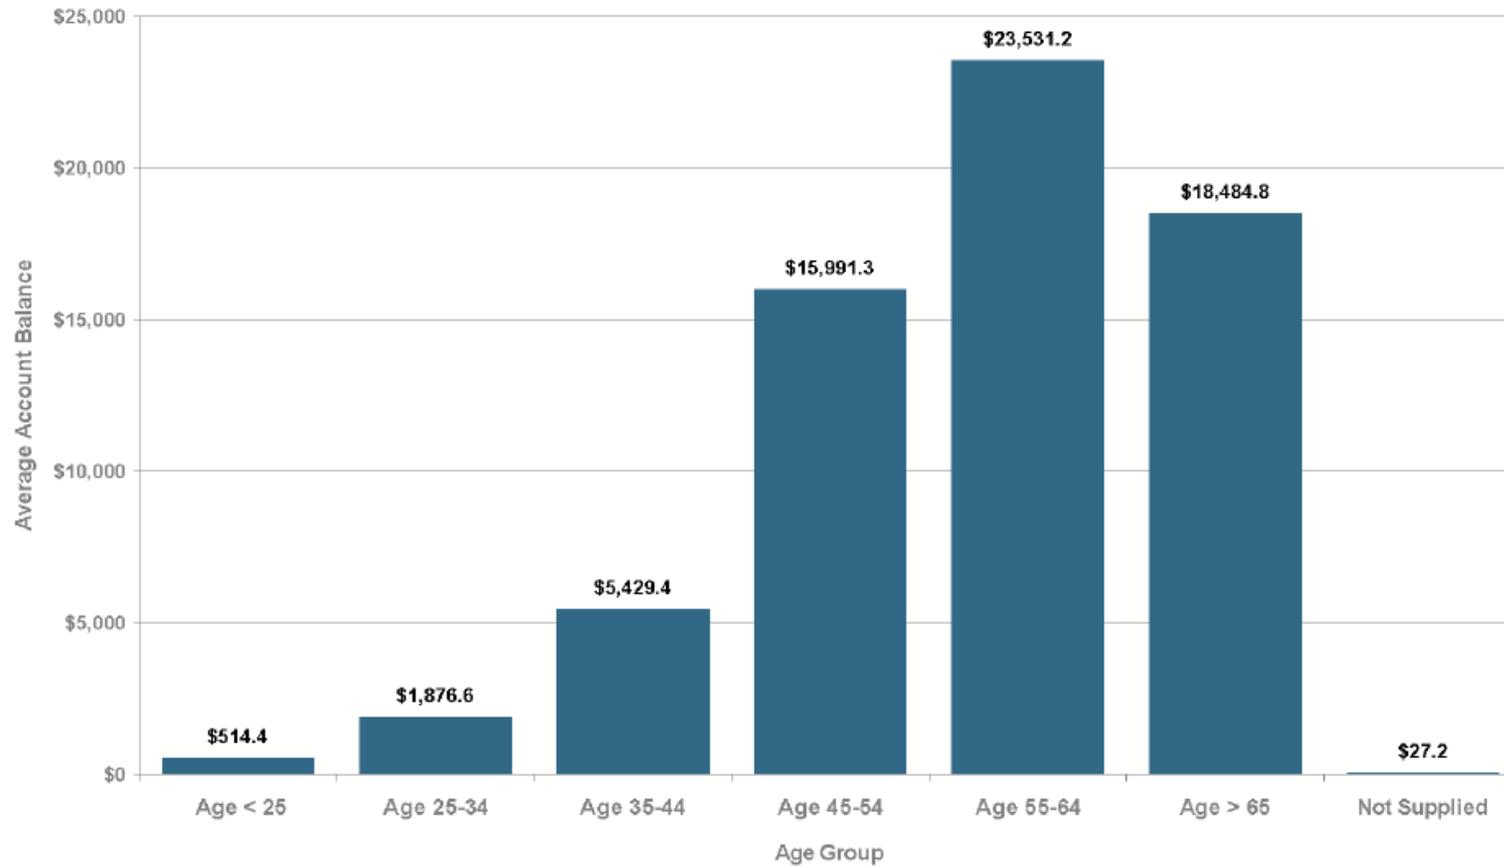

Average Active Contributions: **\$1,311**

PLAN ASSETS

BY AGE - AVERAGE ACCOUNT BALANCE

Average Account Balance: **\$10,724**

North Dakota Public Employees Retirement System

Investments Performance as of 09/30/2012

Before making your investment choices and completing your enrollment form, you should consider the investment objectives, risks, charges and expenses carefully. Please call 877 518-9161 for a paper copy of the prospectus that contains this and other information. Please read the prospectus carefully before investing. To view the prospectuses online, go to tiaa-cref.org/PRO and enter your Plan ID: 405546. You can also view TIAA-CREF's privacy policy, business continuity statement, and frequent trading policy at tiaa-cref.org/PRO.

The performance data quoted represents past performance, and is no guarantee of future results. Your returns and the principal value of your investment will fluctuate so that your mutual fund shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. For performance current to the most recent month-end, go to tiaa-cref.org/planinvestmentoptions and enter your Plan ID: 405546 or call 800 TIAA-CREF (800 842-2273). Performance may reflect waivers or reimbursements of certain expenses. Absent these waivers or reimbursement arrangements, performance results would have been lower. Since inception performance shown is cumulative for periods less than one year.

A NOTE ABOUT RISK

Equity mutual funds generally carry a higher degree of risk than fixed income funds and accounts. This risk is heightened for funds that invest in small and mid-cap stocks and foreign securities.

Fixed income mutual funds are not guaranteed and are subject to interest rate, inflation and credit risks. Funds that invest in non-investment grade securities (i.e. high-yield) present special risks, including significantly higher interest rate and credit risk.

Mutual funds that invest in real estate securities are subject to various risks, including fluctuation in property values, higher expenses or lower income than expected, and potential environmental problems and liability.

More detailed information on risks applicable to a particular investment option can be found in the prospectus or other product literature.

About the Benchmark

A benchmark provides an investor with a point of reference to evaluate an investment's performance. One common type of benchmark used to compare investment performance is called an index. Indexes are unmanaged portfolios of securities designed to track the performance of a particular segment of the market. For example, a large cap stock fund or account will usually be compared to an index that tracks a portfolio of large-cap stocks. Conversely, a bond fund or account is typically compared to an index that tracks a portfolio of bonds that is comparable to the fund or account's portfolio in terms of credit quality, maturity and liquidity. Each mutual fund or account shown in the chart includes performance information for an index that the advisor determined provides a fair comparison of the fund or account's investment performance. Indexes are for comparison purposes only. You cannot invest directly in any index. Index returns do not reflect a deduction for fees or expenses.

Morningstar Disclosures

Certain investment products have been assigned a comparative index by Morningstar, Inc. In such cases, the index that appears may not match those in other websites or publications.

Important Information

77 An investment in the fund is neither insured nor guaranteed by the Federal Deposit Insurance Corporation or any other U.S. government agency. The fund will attempt to maintain a stable net asset value of \$1.00 per share, but it is possible to lose money by investing in the fund.

31 The 7-day money market yield listed more closely reflects the current earnings of the money market mutual fund(s) than does the total return.

40 Accumulations in funds not managed by TIAA-CREF may be subject to administrative charges. These charges are subject to change. Please review current documents related to your plan.

132 As Target Retirement Date Funds are actively managed, their asset allocations are subject to change and may vary from those indicated. They invest in many underlying funds and are exposed to the risks of different areas of the market. The higher a fund's allocation to stocks, the greater the risk. After the target date has been reached, some of these funds may be merged into a fund with a more stable asset allocation. In addition to the fund level expenses these funds are also subject to the expenses of their underlying investments. Please consult the prospectus for more complete information.

34 The Wells Fargo Stable Return Fund is a collective investment trust fund for which Wells Fargo Bank, N.A. ("Wells Fargo") is the investment advisor and trustee. Galliard Capital Management, Inc., a wholly-owned subsidiary of Wells Fargo, serves as subadvisor to the Fund. The Fund charges an annualized fee for investment and administrative services equivalent to 0.85% of assets invested in the Fund. From this fee, the Fund will pay a fee equivalent to 0.50% of assets invested in the Fund to the Recordkeeper for administrative and recordkeeping services performed by it, or its agents, related to the purchase, sale and holding of fund units. The difference between the Fund's total annual operating expenses (expense ratio) and the investment and administrative services fee described above is attributable to investment contract fees (wrap fees), acquired fund fees, subadvisor investment management expenses, audit, valuation and 5500 fees. Fund returns reflect all income, realized and unrealized capital gains and losses and all annual fund operating expenses. The Fund is not insured by the FDIC, Federal Reserve Bank, nor guaranteed by Wells Fargo or any affiliate, including Galliard Capital Management. Past performance is not an indication of how the investment will perform in the future. For additional details, please visit https://www.galliard.com/reports/srf_disclosure.pdf or refer to the Fund fact sheet.

37 Data provided by Galliard Capital Management. Neither TIAA-CREF nor its affiliates has independently verified the accuracy or completeness of this information.

45 The net annual expense reflects a contractual reimbursement of various expenses, which will remain in effect until terminated. Had fees not been waived and/or expenses reimbursed currently or in the past, returns would have been lower. Please see the prospectus for details.

46 The net annual expense reflects a voluntary reimbursement of various expenses, which will remain in effect until terminated. Had fees not been waived and/or expenses reimbursed currently or in the past, returns would have been lower. Please see the prospectus for details.

51 The net expense ratio reflects total annual fund operating expenses excluding interest expense. If interest expense was included, returns would have been lower. Please see the prospectus for details.

86 The Wells Fargo Stable Return Fund is not insured or guaranteed by any governmental agency. Investments in the fund are subject to the various risks associated with investing in investment contracts, which include default, interest-rate, and liquidity risk. Default risk is the risk that companies or individuals will not be able to make their required payments on debt obligations. Interest rate risk is the risk that interest payments of debt securities may become less competitive during periods of rising interest rates and declining bond prices. Liquidity risk is the risk that illiquid securities may be difficult to sell at their fair market value. Before investing, please see the fund's Disclosure Document for more detailed information about these and other risks.

1203 Shares held less than 60 calendar days may be subject to a 2.00% redemption fee. Please see the prospectus for details. The fund performance shown does not reflect the deduction of this fee. Had the fee been deducted, returns would have been lower.
