Independent Auditor's Report

To the School Board Williams County School District No. 8 Williston, North Dakota

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities and each major fund of Williams County School District No. 8, Williston, ND (School District) as of and for the year ended June 30, 2017, and the related notes to the financial statements, which collectively comprise the School District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities and each major fund of Williams County School District No. 8, Williston, North Dakota, as of June 30, 2017, and the respective changes in financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the budgetary comparison information, Schedule of Employer's Share of Net Pension Liability and Schedule of Employer's Contributions as listed in the table of contents be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Management has omitted the management's discussion and analysis that accounting principles generally accepted in the United States of America require to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Our opinion on the basic financial statements is not affected by the missing information.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Williams County School District No. 8, Williston, North Dakota's financial statements. The School District Officials are presented for purposes of additional analysis and are not a required part of the financial statements. Such information has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on it.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated January 17, 2018 on our consideration of Williams County School District No. 8, Williston, North Dakota's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the School District's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the School District's internal control over financial reporting and compliance.

Reconciliation of Governmental Funds Statement of Revenues, Expenditures and Changes in Fund Balances to
the Statement of Activities
Year Ended June 30, 2017

Net change in fund balances - total governmental funds		\$ 15,567,355
The change in net position reported for governmental activities in the statement of activities is different because:		
Governmental funds report capital outlays as expenditures and proceeds from the sale of assets increase financial resources. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense and only the gain or loss on the disposal of assets is reported. Current year capital outlay Donated capital assets Current year depreciation expense Loss on disposal of capital assets Net amount	1,971,419 600,000 (276,491) (2,143)	2,292,785
Repayment of debt principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net position. Principal payments		5,700,000
The issuance of long-term debt provides current financial resources to governmental funds, but the issuance increases long-term liabilities in the statement of net position. Bond issuance proceeds Other financing source - refunding bonds		(13,180,594) (5,000,000)
Some expenses reported in the statement of activities do not require the use of current financial resources and are not reported as expenditures in governmental funds. Net increase in compensated absences \$ Net decrease in post retirement benefits Net amount	(9,679) 11,857	2,178
Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds.		107,452
Changes to net pension liability and pension related to deferred outflows and inflows do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds.		102,463
Change in net position of governmental activities		\$ 5,591,639

Note 1 - Summary of Significant Accounting Policies

The financial statements of Williams County School District No. 8, Williston, North Dakota (School District), have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard setting body for establishing governmental accounting and financial reporting principles. The more significant of the government's accounting policies are described below.

Reporting Entity

The accompanying financial statements present the net position of Williams County School District No. 8. The school district has considered all potential component units for which the school district is financially accountable and other organizations for which the nature and significance of their relationships with the school district is such that exclusion would cause the school district's financial statements to be misleading or incomplete. The Governmental Accounting Standards Board has set forth criteria to be considered in determining financial accountability. This criteria includes appointing a voting majority of an organization's governing body and (1) the ability of Williams County School District No. 8 to impose its will on that organization or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on Williams County School District No. 8.

Based on these criteria, there are no component units to be included with Williams County School District No. 8 as a reporting entity.

Basis of Presentation, Basis of Accounting

Government-wide statements - The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the primary government. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Major individual government funds are reported as separate columns in the fund financial statements.

Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Government fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

The school district reports the following major governmental funds:

General Fund – This is the school district's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

Building Fund – This is a capital projects fund used to account for additions and certain repairs to the buildings owned by the district and will be used to repay the bonds issued to finance the construction of capital asset projects in future years.

As a general rule the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments-in-lieu of taxes where the amounts are reasonably equivalent in value to the interfund service provided.

Capital Assets

Capital assets include plant and equipment and are reported in the governmental activities column in the government-wide financial statements. Capital assets are defined by the school district as assets with an initial, individual cost of \$5,000 or more. Such assets are recorded at cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized. Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets is not capitalized.

Capital assets are depreciated using the straight-line method over the following estimated useful lives:

Buildings	10-50 years
Furniture and equipment	10 years
Land improvements	20 years
Vehicles and equipment	8 years

Compensated Absences

Vested or accumulated vacation leave is reported in the government-wide statement of net position. Compensation for unused vacation leave will be granted to the superintendent and business manager upon termination of employment with the school district. Vacation benefits are negotiated with each individual's contract. Teachers are not provided with vacation benefits.

Deferred Outflows and Inflows of Resources

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The School District has two items that qualify for reporting in this category. They are the contributions made to pension plans after the measurement date and prior to the fiscal year-end, and changes in the net pension liability not included in pension expense reported in the government-wide statement of net position.

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, *deferred inflows of resources*, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The School District has two types of items that qualify for reporting in this category. The district reports unavailable revenues from property taxes on the governmental funds balance sheet. These amounts are deferred and recognized as an inflow of resources in the period that the amounts become available. The other item is changes in the net pension liability not included in pension expense reported in the government-wide statement of net position.

Long-Term Obligations

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the governmental activities statement of net position.

Interfund Transactions

In the governmental fund statements, transactions that constitute reimbursements to a fund for expenditures initially made from it that are properly applicable to another fund, are recorded as expenditures in the reimbursing fund and as reductions of expenditures in the fund that is reimbursed.

All other interfund transactions, except reimbursements, are reported as transfers.

In the government-wide financial statements, interfund transactions have been eliminated.

Net Position and Fund Balance

Net position represents the difference between assets, deferred outflows of resources, liabilities, and deferred inflows of resources in the government-wide financial statements. Net investments in capital assets, consists of capital assets, net of accumulated depreciation, reduced by the outstanding balance of any long-term debt used to build or acquire the capital assets. Net position is reported as restricted in the government-wide financial statements when there are limitations imposed on its use through external restrictions imposed by creditors, grantors, or laws or regulations of other governments.

In the governmental fund financial statements, fund balances are classified as nonspendable, restricted, committed, assigned, or unassigned.

- Nonspendable fund balance represents a portion of fund balance that includes amounts that cannot be spent because they are either a) not in spendable form or b) legally or contractually required to be maintained intact.
- Restricted fund balance represents a portion of fund balance that reflects constraints placed on the use of resources (other than nonspendable items) that are either: a) externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments; or b) imposed by law through constitutional provisions or enabling legislation.
- Committed fund balance includes amounts that can only be used for specific purposes pursuant to constraints imposed by formal action of the government's highest level of decision-making authority, which is the School Board, through ordinance or resolution.
- Assigned fund balance represents amounts constrained by the government's intent to be used for specific purposes, but neither restricted nor committed. Fund balance may be assigned by the Business Manager.
- Unassigned fund balance represents residual classification for the general fund. This classification represents fund balance not assigned to other funds and not restricted, committed, or assigned to specific purposes within the general fund. The general fund should be the only fund that reports a positive unassigned fund balance amount. In other governmental funds, if expenditures incurred for specific purposes exceeded the amounts restricted, committed, or assigned to those purposes, it would be necessary to report a negative unassigned fund balance.

The School District uses *restricted* amounts first when both restricted and unrestricted fund balance is available unless there are legal documents/contracts that prohibit doing this, such as a grant agreement requiring dollar for dollar spending. Additionally, the School District would first use committed, then assigned, and lastly unassigned amounts of unrestricted fund balance when expenditures are made.

Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the North Dakota Public Employees Retirement System (NDPERS) and the North Dakota Teachers' Fund for Retirement (TFFR) and additions to/deductions from NDPERS's and TFFR's fiduciary net position have been determined on the same basis as they are reported by NDPERS and TFFR. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Salaries and Benefits Payable

Salaries and benefits payable consists of salaries earned by employees but not paid until after year-end. It also consists of benefits owed to state, and private agencies for amounts withheld from teacher's salaries as of June 30.

Note 2 - Deposits and Investments

In accordance with North Dakota Statutes, the school district maintains deposits at the depository banks designated by the governing board. All depositories are members of the Federal Reserve System. Deposits must either be deposited with the Bank of North Dakota or in another financial institution situated and doing business within the state. Deposits, other than with the Bank of North Dakota, must be fully insured or bonded. In lieu of a bond, a financial institution may provide a pledge of securities equal to 110% of the deposits not covered by insurance or bonds.

Authorized collateral includes bills, notes, or bonds issued by the United States government, its agencies or instrumentalities, all bonds and notes guaranteed by the United States government, Federal land bank bonds, bonds, notes, warrants, certificates of indebtedness, insured certificates of deposit, shares of investment companies registered under the Investment Companies Act of 1940, and all other forms of securities issued by the State of North Dakota, its boards, agencies or instrumentalities or by any county, city, township, school district, park district, or other political subdivision of the state of North Dakota whether payable from special revenues or supported by the full faith and credit of the issuing body and bonds issued by another state of the United States or such other securities approved by the banking board.

Custodial Credit Risk

Custodial credit risk is the risk that an entity will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party if the counterparty fails. At June 30, 2017, the school district's carrying amount of deposits was \$24,859,143 and the bank balance was \$26,202,731. Of the bank balance, \$250,000 was covered by Federal Depository Insurance. The remaining balance was collateralized with securities held by the pledging financial institution's agent in the government's name.

Interest Rate Risk

The School District does not have a formal investment policy that limits investments as a means of managing its exposure to fair value losses arising from changing interest rates.

Credit Risk

The school district may invest idle funds as authorized in North Dakota Statutes, as follows:

- a) Bonds, treasury bills and notes, or other securities that are a direct obligation insured or guaranteed by, the treasury of the United States, or its agencies, instrumentalities, or organizations created by an Act of Congress.
- b) Securities sold under agreements to repurchase written by a financial institution in which the underlying securities for the agreement to repurchase are the type listed above.
- c) Certificates of Deposit fully insured by the federal deposit insurance corporation.
- d) Obligations of the state.

Concentration of Credit Risk

The school district does not have a limit on the amount the district may invest in any one issuer.

Note 3 - Taxes Receivable

Taxes receivable represents the past three years of uncollected current and delinquent taxes. No allowance has been established for uncollectible taxes receivable.

The county treasurer acts as an agent to collect property taxes levied in the county for all taxing authorities. Any material tax collections are distributed after the end of each month.

Property taxes are levied as of January 1. The property taxes attach as an enforceable lien on property on January 1 and may be paid in two installments. The first installment includes one-half of the real estate taxes and all the special assessments and the second installment is the balance of the real estate taxes. The first installment is due by March 1 and the second installment is due by October 15. A 5% discount on property taxes is allowed if all taxes and special assessments are paid by February 15. After the due dates, the bill becomes delinquent and penalties are assessed.

Most property owners choose to pay property taxes and special assessments in a single payment on or before February 15 and receive the discount on the property taxes.

Note 4 - Due from County Treasurer

The amount due from county treasurer consists of the cash on hand for taxes collected but not remitted to the school at June 30.

Note 5 - Capital Assets

The following is a summary of changes in capital assets for the year ended June 30, 2017:

Governmental Activities	Balance July 1, 2016	Additions Deletions		Balance June 30, 2017	
Capital assets, not being depreciated Land Construction in progress	\$ - 141,853	\$ 600,000 1,625,554	\$ - -	\$ 600,000 1,767,407	
Total capital assets, not being depreciated	141,853	2,225,554		2,367,407	
Capital assets, being depreciated Buildings	4,010,297			4,010,297	
Furniture and equipment	4,010,297 901,870	22,975	(31,118)	893,727	
Land Improvements Vehicles and equipment	934,453	78,491 244,399	(245,468)	78,491 933,384	
Total capital assets, being depreciated	5,846,620	345,865	(276,586)	5,915,899	
Less accumulated depreciation for Buildings	1,273,734	150,031		1,423,765	
Furniture and equipment	428,568	69,777	(29,424)	468,921	
Land Improvements Vehicles and equipment	580,667	515 56,168	(245,468)	515 391,367	
Total accumulated depreciation	2,282,969	276,491	(274,892)	2,284,568	
Capital assets being depreciated, net	3,563,651	69,374	(1,694)	3,631,331	
Governmental activities capital assets, net	\$ 3,705,504	\$ 2,294,928	\$ (1,694)	\$ 5,998,738	

During the year ended June 30, 2017, the School District was donated land at an estimated fair value of \$600,000 for the purpose of constructing a new school building.

Construction in progress is related to the construction of a new school building. The School District had outstanding commitments for construction contracts related to the building of the new school of approximately \$14,841,000 as of June 30, 2017, of which \$402,702 was paid as of June 30, 2017.

Depreciation expense was charged to functions/programs of the school district as follows:

Governmental activities	
Regular programs	\$ 218,383
Operation and maintenance of plant	3,177
Student transportation	54,931
Total depreciation expense -	
governmental activities	\$ 276,491

Note 6 - Long-Term Debt

Changes in Long-Term Liabilities

During the year ended June 30, 2017, the following changes occurred in liabilities reported in long-term liabilities:

Governmental Activities

	-	Balance y 1, 2016	Iı	ncreases	Γ	Decreases	Ju	Balance ne 30, 2017	 ue Within One Year
Compensated absences	\$	10,834	\$	11,850	\$	(2,171)	\$	20,513	\$ 20,513
Bonds payable		-	1.	3,000,000		(700,000)		12,300,000	515,000
Bond premiums		-		180,594		-		180,594	9,030
Certificates of				,				,	,
indebtedness		-		5,000,000	(5,000,000)		-	-
Post-retirement benefit		11,857		-		(11,857)		-	-
						<u> </u>			
Total	\$	22,691	\$ 1	8,192,444	\$(5,714,028)	\$	12,501,107	\$ 544,543

Outstanding debt at June 30, 2017 (excluding compensated absences) consisted of the following issues.

\$8,000,000 Limited Tax Building Fund Bonds, Series 2017A; due in annual installments of \$524,950 to \$529,725 through August 1, 2036; interest at 2.0% to 3.5% paid annually.	\$ 7,575,000
\$5,000,000 Limited Tax Building Fund Bonds, Series 2017B; due in annual installments of \$332,250 to \$337,400 through August 1, 2036; interest at 2.0% to 3.5% paid annually.	4,725,000
	\$ 12,300,000

Certificates of indebtedness were issued in December 2016, prior to issuing the limited tax building fund bonds. The certificates of indebtedness were issued for the purposes of providing funds, together with any other funds available, to finance the construction of a new middle school and to otherwise improve school facilities and property.

The Series 2017A bonds were also issued for the purposes of providing funds, together with any other funds available, to finance the construction of a new middle school and to otherwise improve school facilities and property. The Series 2017B bonds were issued as a current refunding of the certificates of indebtedness. The transaction did not result in an economic gain or loss. The Series 2017A and 2017B bonds are limited obligations of the School District payable from the proceeds of the School District's building fund tax levy. The bonds are payable through 2036. The total principal and interest remaining to be paid on the bonds is \$16,379,675. Principal payments of \$700,000 and interest payments of \$162,769 were made in the current year using general fund resources. The building fund tax revenues were \$1,281,981 in the current year. The general fund was used to make the debt service payments on the bonds in the current year and the building fund will be used to make the debt service payments in future years.

Debt service requirements on long-term debt at June 30, 2017 are as follows:

		Principal		Interest	
Year Ending December 31					
2018	\$	515,000	\$	345,175	
2019		530,000		334,875	
2020		540,000		324,275	
2021		550,000		313,475	
2022		560,000		302,475	
2023-2027		2,990,000		1,313,900	
2028-2032		3,450,000		865,875	
2033-2036		3,165,000		279,625	
	_\$	12,300,000	\$	4,079,675	

Note 7 - Risk Management

Williams County School District No. 8 is exposed to various risks of loss relating to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters.

In 1986 state agencies and political subdivisions of the state of North Dakota joined together to form the North Dakota Insurance Reserve Fund (NDIRF), a public entity risk pool currently operating as a common risk management and insurance program for the state and over 2,000 political subdivisions. Williams County School District No. 8 pays an annual premium to NDIRF for its general liability, automobile insurance coverage. The coverage by NDIRF is limited to losses of two million dollars per occurrence for general liability and automobile and to \$12,793 for inland marine coverage.

Williams County School District No. 8 also participates in the North Dakota Fire and Tornado Fund and the State Bonding Fund. The school district pays an annual premium to the Fire and Tornado Fund to cover property damage to buildings and personal property. Replacement cost coverage is provided by estimating replacement cost in consultation with the Fire and Tornado Fund. The Fire and Tornado Fund is reinsured by a third party insurance carrier for losses in excess of two million dollars per occurrence during a 12 month period. The State Bonding Fund currently provides political subdivision with blanket fidelity bond coverage in the amount of \$2,000,000 for its employees. The State Bonding Fund does not currently charge any premium for this coverage.

Williams County School District No. 8 has workers compensation with the North Dakota Workforce Safety and Insurance. The district also purchases commercial health insurance for employees, limited to \$641 for a single plan, \$1,128 for dependent plan and \$1,666 for family plan.

Settled claims resulting from these risks have not exceeded insurance coverage in any of the past three fiscal years.

Note 8 - Pension Plans

A. Plan Descriptions

The School District participates in the following defined benefit pension plans:

North Dakota Teachers' Fund for Retirement (TFFR)

The following brief description of TFFR is provided for general information purposes only. Participants should refer to NDCC Chapter 15-39.1 for more complete information.

TFFR is a cost-sharing multiple-employer defined benefit pension plan covering all North Dakota public teachers and certain other teachers who meet various membership requirements. TFFR provides for pension, death and disability benefits. The cost to administer the TFFR plan is financed by investment income and contributions.

Responsibility for administration of the TFFR benefits program is assigned to a seven-member Board of Trustees (Board). The Board consists of the State Treasurer, the Superintendent of Public Instruction, and five members appointed by the Governor. The appointed members serve five-year terms which end on June 30 of alternate years. The appointed Board members must include two active teachers, one active school administrator, and two retired members. The TFFR Board submits any necessary or desirable changes in statutes relating to the administration of the fund, including benefit terms, to the Legislative Assembly for consideration. The Legislative Assembly has final authority for changes to benefit terms and contribution rates.

North Dakota Public Employees' Retirement System (Main System) (NDPERS)

The following brief description of NDPERS is provided for general information purposes only. Participants should refer to NDCC Chapter 54-52 for more complete information.

NDPERS is a cost-sharing multiple-employer defined benefit pension plan that covers substantially all employees of the State of North Dakota, its agencies and various participating political subdivisions. NDPERS provides for pension, death and disability benefits. The cost to administer the plan is financed through the contributions and investment earnings of the plan.

Responsibility for administration of the NDPERS defined benefit pension plan is assigned to a Board comprised of seven members. The Board consists of a Chairman, who is appointed by the Governor; one member appointed by the Attorney General; one member appointed by the State Health Officer; three members elected by the active membership of the NDPERS system; and one member elected by the retired public employees. Effective July 1, 2015, the board was expanded to include two members of the legislative assembly appointed by the chairman of the legislative management.

B. Pension Benefits

TFFR

For purposes of determining pension benefits, members are classified within one of three categories. Tier 1 grandfathered and Tier 1 non-grandfathered members are those with service credit on file as of July 1, 2008. Tier 2 members are those newly employed and returning refunded members on or after July 1, 2008.

Tier 1 Grandfathered

A Tier 1 grandfathered member is entitled to receive unreduced benefits when three or more years of credited service as a teacher in North Dakota have accumulated, the member is no longer employed as a teacher and the member has reached age 65, or the sum of age and years of service credit equals or exceeds 85. TFFR permits early retirement from ages 55 to 64, with benefits actuarially reduced by 6% per year for every year the member's retirement age is less than 65 years or the date as of which age plus service equal 85. In either case, benefits may not exceed the maximum benefits specified in Section 415 of the Internal Revenue Code.

Pension benefits paid by TFFR are determined by NDCC Section 15-39.1-10. Monthly benefits under TFFR are equal to the three highest annual salaries earned divided by 36 months and multiplied by 2.00% times the number of service credits earned. Retirees may elect payment of benefits in the form of a single life annuity, 100% or 50% joint and survivor annuity, ten or twenty-year term certain annuity, partial lump-sum option or level income with Social Security benefits. Members may also qualify for benefits calculated under other formulas.

Tier 1 Non-Grandfathered

A Tier 1 non-grandfathered member is entitled to receive unreduced benefits when three or more years of credited service as a teacher in North Dakota have accumulated, the member is no longer employed as a teacher and the member has reached age 65, or has reached age 60 and the sum of age and years of service credit equals or exceeds 90. TFFR permits early retirement from ages 55 to 64, with benefits actuarially reduced by 8% per year from the earlier of age 60/Rule of 90 or age 65. In either case, benefits may not exceed the maximum benefits specified in Section 415 of the Internal Revenue Code.

Pension benefits paid by TFFR are determined by NDCC Section 15-39.1-10. Monthly benefits under TFFR are equal to the three highest annual salaries earned divided by 36 months and multiplied by 2.00% times the number of service credits earned. Retirees may elect payment of benefits in the form of a single life annuity, 100% or 50% joint and survivor annuity, ten or twenty-year term certain annuity, partial lump-sum option or level income with Social Security benefits. Members may also qualify for benefits calculated under other formulas.

Tier 2

A Tier 2 member is entitled to receive unreduced benefits when five or more years of credited service as a teacher in North Dakota have accumulated, the member is no longer employed as a teacher and the member has reached age 65, or has reached age 60 and the sum of age and years of service credit equals or exceeds 90. TFFR permits early retirement from ages 55 to 64, with benefits actuarially reduced by 8% per year from the earlier of age 60/Rule of 90 or age 65. In either case, benefits may not exceed the maximum benefits specified in Section 415 of the Internal Revenue Code.

Pension benefits paid by TFFR are determined by NDCC Section 15-39.1-10. Monthly benefits under TFFR are equal to the five highest annual salaries earned divided by 60 months and multiplied by 2.00% times the number of service credits earned. Retirees may elect payment of benefits in the form of a single life annuity, 100% or 50% joint and survivor annuity, ten or twenty-year term certain annuity, partial lump-sum option or level income with Social Security benefits. Members may also qualify for benefits calculated under other formulas.

NDPERS

Benefits are set by statute. NDPERS has no provision or policies with respect to automatic and ad hoc postretirement benefit increases. Member of the Main System are entitled to unreduced monthly pension benefits beginning when the sum of age and years of credited service equal or exceed 85 (Rule of 85), or at normal retirement age (65). For members hired on or after January 1, 2016 the Rule of 85 will be replaced with the Rule of 90 with a minimum age of 60. The monthly pension benefit is equal to 2.00% of their average monthly salary, using the highest 36 months out of the last 180 months of service, for each year of service. The plan permits early retirement at ages 55-64 with three or more years of service.

Members may elect to receive the pension benefits in the form of a single life, joint and survivor, term-certain annuity, or partial lump sum with ongoing annuity. Members may elect to receive the value of their accumulated contributions, plus interest, as a lump sum distribution upon retirement or termination, or they may elect to receive their benefits in the form of an annuity. For each member electing an annuity, total payment will not be less than the members' accumulated contributions plus interest.

C. Death and Disability Benefits

TFFR

Death benefits may be paid to a member's designated beneficiary. If a member's death occurs before retirement, the benefit options available are determined by the member's vesting status prior to death. If a member's death occurs after retirement, the death benefit received by the beneficiary (if any) is based on the retirement plan the member selected at retirement.

An active member is eligible to receive disability benefits when: (a) a total disability lasting 12 months or more does not allow the continuation of teaching, (b) the member has accumulated five years of credited service in North Dakota, and (c) the Board of Trustees of TFFR has determined eligibility based upon medical evidence. The amount of the disability benefit is computed by the retirement formula in NDCC Section 15-39.1-10 without consideration of age and uses the member's actual years of credited service. There is no actuarial reduction for reason of disability retirement.

NDPERS

Death and disability benefits are set by statute. If an active member dies with less than three years of service for the Main System, a death benefit equal to the value of the member's accumulated contributions, plus interest, is paid to the member's beneficiary. If the member has earned more than three years of credited service for the Main System, the surviving spouse will be entitled to a single payment refund, life-time monthly payments in an amount equal to 50% of the member's accrued normal retirement benefit, or monthly payments in an amount equal to the member's accrued 100% Joint and Survivor retirement benefit if the member had reached normal retirement age prior to date of death. If the surviving spouse dies before the member's accumulated pension benefits are paid, the balance will be payable to the surviving spouse's designated beneficiary.

Eligible members who become totally disabled after a minimum of 180 days of service, receive monthly disability benefits equal to 25% of their final average salary with a minimum benefit of \$100. To qualify under this section, the member has to become disabled during the period of eligible employment and apply for benefits within one year of termination. The definition of disabled is set by the NDPERS in the North Dakota Administrative Code.

D. Refunds of Member Account Balance

TFFR

A vested member who terminates covered employment may elect a refund of contributions paid plus 6% interest or defer payment until eligible for pension benefits. A non-vested member who terminates covered employment must claim a refund of contributions paid before age 70½. Refunded members forfeit all service credits under TFFR. These service credits may be repurchased upon return to covered employment under certain circumstances, as defined by the NDCC.

NDPERS

Upon termination, if a member of the Main System is not vested (is not 65 or does not have three years of service), they will receive the accumulated member contributions and vested employer contributions, plus interest, or may elect to receive this amount at a later date. If the member has vested, they have the option of applying for a refund or can remain as a terminated vested participant. If a member terminated and withdrew their accumulated member contribution and is subsequently reemployed, they have the option of repurchasing their previous service.

The member's account balance includes the vested employer contributions equal to the member's contributions to an eligible deferred compensation plan. The minimum member contribution is \$25 and the maximum may not exceed the following:

1 to 12 months of service – Greater of one percent of monthly salary or \$25
13 to 24 months of service – Greater of two percent of monthly salary or \$25
25 to 36 months of service – Greater of three percent of monthly salary or \$25
Longer than 36 months of service – Greater of four percent of monthly salary or \$25

E. Member and Employer Contributions

TFFR

Member and employer contributions paid to TFFR are set by NDCC Section 15-39.1-09. Every eligible teacher in the State of North Dakota is required to be a member of TFFR and is assessed at a rate of 11.75% of salary as defined by NDCC Section 15-39.1-04. Every governmental body employing a teacher must also pay into TFFR a sum equal to 12.75% of the teacher's salary. Member and employer contributions will be reduced to 7.75% each when the fund reaches 100% funded ratio on an actuarial basis.

NDPERS

Member and employer contributions paid to NDPERS are set by statute and are established as a percent of covered compensation. Member contribution rates are 7% and employer contribution rates are 7.12% of covered compensation plus an additional 1.14% for Retiree Health Insurance Credit.

F. Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

TFFR

At June 30, 2017, the Employer reported a liability of \$4,583,716 for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2016, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The Employer's proportion of the net pension liability was based on the Employer's share of covered payroll in the pension plan relative to the covered payroll of all participating TFFR employers. At June 30, 2016, the Employer's proportion was 0.31286915 percent which was a decrease of 0.01528185 percent from its proportion measured as of June 30, 2015.

For the year ended June 30, 2017, the Employer recognized pension expense of \$245,990. At June 30, 2017, the Employer reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources		In	Deferred Inflows of Resources	
Differences between expected and actual experience	\$	21,649	\$	21,703	
Changes in assumptions	ψ	382,873	ψ	- 21,705	
Net difference between projected and actual		562,675			
earnings on pension plan investments		381,031		-	
Changes in proportion and differences between employer contributions and proportionate)			
share of contributions		-		283,678	
Employer contributions subsequent to the					
measurement date		747,657		-	
Total	\$	1,533,210	\$	305,381	

\$747,657 reported as deferred outflows of resources related to pensions resulting from Employer contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2018.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ended June 30	
2018	\$ 89,761
2019	89,761
2020	182,867
2021	124,573
2022	22,308
Thereafter	(29,098)

NDPERS

At June 30, 2017, the Employer reported a liability of \$532,257 for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2016, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The Employer's proportion of the net pension liability was based on the School District's share of covered payroll in the Main System pension plan relative to the covered payroll of all participating Main System employers. At June 30, 2016, the Employer's proportion was 0.054613 percent which was an increase of 0.000640 percent from its proportion measured as of June 30, 2015.

For the year ended June 30, 2017, the Employer recognized pension expense of \$117,635. At June 30, 2017, the School District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources		Deferred Inflows of Resources	
Differences between expected and actual				
experience	\$	7,996	\$	4,928
Changes in assumptions		49,067		26,443
Net difference between projected and actual				
earnings on pension plan investments		74,257		-
Changes in proportion and differences between employer contributions and proportionate		.,		
share of contributions		81,900		
Employer contributions subsequent to the		81,900		-
measurement date		67,393		-
Total	\$	280,613	\$	31,371

\$67,393 reported as deferred outflows of resources related to pensions resulting from Employer contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2018.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ended June 30		
2018	\$ 37,903	
2019	37,903	
2020	54,102	
2021	41,490	
2022	10,451	

G. Actuarial Assumptions

TFFR

The total pension liability in the July 1, 2016 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	2.75%
Salary Increases	4.25% to 14.50%, varying by
	service, including inflation and
	productivity
Investment rate of return	7.75%, net of investment expenses
Cost-of-living adjustments	None

For active and inactive members, mortality rates were based on the RP-2014 Employee Mortality Table, projected generationally using Scale MP-2014. For healthy retirees, mortality rates were based on the RP-2014 Healthy Annuitant Mortality Table set back one year, multiplied by 50% for ages under 75 and grading up to 100% by age 80, projected generationally using Scale MP-2014. For disabled retirees, mortality rates were based on the RP-2014 Disabled Mortality Table set forward four years.

The actuarial assumptions used were based on the results of an actuarial experience study dated April 30, 2015. They are the same as the assumptions used in the July 1, 2016, funding actuarial valuation for TFFR.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the Fund's target asset allocation are summarized in the following table:

	Target Allocation	Long-Term Expected Real Rate of Return
Asset Class		
Global Equities	58.0%	7.30%
Global Fixed Income	23.0%	0.90%
Global Real Assets	18.0%	5.32%
Cash Equivalents	1.0%	0.00%

NDPERS

The total pension liability in the July 1, 2016 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3.50%
Salary Increases	4.0% to 20.0% including inflation
Investment rate of return	8.00%
Cost-of-living adjustments	None

For active members, inactive members and healthy retirees, mortality rates were based on the RP-2000 Combined Healthy Mortality Table set back two years for males and three years for females, projected generationally using the SSA 2014 Intermediate Cost scale from 2014. For disabled retirees, mortality rates were based on the RP-2000 Disabled Mortality Table set back one year for males (no setback for females) multiplied by 125%.

The actuarial assumptions used were based on the results of an actuarial experience study completed in January 2015. They are the same as the assumptions used in the July 1, 2016, funding actuarial valuation for NDPERS.

As a result of the 2015 actuarial experience study, the NDPERS Board adopted several changes to the actuarial assumptions effective July 1, 2016. This includes changes to the mortality tables, disability incidence rates, retirement rates, administrative expenses, salary scale, and percent married assumption.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the Fund's target asset allocation are summarized in the following table:

	Target Allocation	Long-Term Expected Real Rate of Return
Asset Class		
Domestic Equity	31.0%	6.60%
International Equity	21.0%	7.30%
Private Equity	5.0%	10.90%
Domestic Fixed Income	17.0%	1.49%
International Fixed Income	5.0%	-0.45%
Global Real Assets	20.0%	5.24%
Cash Equivalents	1.0%	0.00%

H. Discount Rate

The discount rate used to measure the total pension liability for TFFR was 7.75 percent and NDPERS was 8 percent as of June 30, 2016. The projection of cash flows used to determine the discount rate assumes that member and employer contributions will be made at rates equal to those based on the July 1, 2016, Actuarial Valuation Report. For this purpose, only employer contributions that are intended to fund benefits of current plan members and their beneficiaries are included. Projected employer contributions that are intended to fund the service costs of future plan members and their beneficiaries, as well as projected contributions from future plan members, are not included. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments for current plan members as of June 30, 2016. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability as of June 30, 2016.

I. Sensitivity of the Employer's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate

The following presents the Employer's proportionate share of the net pension liability calculated using the discount rate of 7.75 percent for TFFR and 8 percent for NDPERS, as well as what the Employer's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.75/7 percent) or 1-percentage-point higher (8.75/9 percent) than the current rate:

	1% Decrease (6.75/7%)			Current Single Discount Rate (7.75/8%)		1% Increase (8.75/9%)	
District's proportionate share of the TFFR net pension liability	\$	5,945,424	\$	4,583,716	\$	3,449,542	
District's proportionate share of the NDPERS net pension liability	\$	754,996	\$	532,257	\$	344,588	

J. Pension Plan Fiduciary Net Position

Detailed information about the pension plan's fiduciary net position is available in the separately issued TFFR and NDPERS financial reports.

Note 9 - Transfers

The following is a reconciliation between transfers in and transfers out as reported in the financial statements for the year ended June 30, 2017, respectively:

Year Ending June 30, 2017	Transfers In	Transfers Out		
General fund Building fund	\$ - 1,080,000	\$ 1,080,000		
	\$ 1,080,000	\$ 1,080,000		

The transfers were made to move funds to the building fund for the construction of a new school.

Note 10 - Operating Leases

The School District leases a modular classroom under a long-term lease. This lease agreement expires in December 2017 and is payable in installments of \$3,083 monthly. Future minimum lease payments are as follows:

Year Ending June 30,	Operating Lease
2018	\$ 15,415
Total minimum lease payments	\$ 15,415

Changes of Assumptions

Amounts reported in 2016 and later reflect the following actuarial assumption changes based on the results of an actuarial experience study dated April 30, 2015.

- Investment return assumption lowered from 8% to 7.75%.
- Inflation assumption lowered from 3% to 2.75%.
- Total salary scale rates lowered by 0.25% due to lower inflation.
- Added explicit administrative expense assumption, equal to prior year administrative expense plus inflation.
- Rates of turnover and retirement were changed to better reflect anticipated future experience.
- Updated mortality assumption to the RP-2014 mortality tables with generational improvement.

Schedule of Employer's Share of Net Pension Liability ND Public Employees Retirement System Last 10 Fiscal Years*

		2017 20		2016		2015

Note 1 – Stewardship, Compliance and Accountability

Budgetary Information

The Board of Education adopts an annual budget on a basis consistent with accounting principles generally accepted in the United States for the general fund.

The following procedures are followed in establishing the budgetary data reflected in the financial statements:

- The annual budget must be prepared and School District taxes must be levied on or before the 10th of October of each year.
- The School Board reviews the budget, may make revisions and approves it on or before August 15. The budget must be filed with the County Auditor by August 25.
- The taxes levied must be certified to the county auditor by October 10.
- The operating budget includes proposed expenditures and the means of financing them.
- Each budget is controlled by the business manager at the revenue and expenditure function/object level.
- The current budget, except for property taxes, may be amended during the year for any revenues and appropriations not anticipated at the time the budget was prepared.
- All appropriations lapse at year-end.

Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

To the School Board Williams County School District No. 8 Williston, North Dakota

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of the governmental activities and each major fund of Williams County School District No. 8 as of and for the year ended June 30, 2017, and the related notes to the financial statements, which collectively comprise Williams County School District No. 8's basic financial statements, and have issued our report thereon dated January 17, 2018.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered Williams County School District No. 8's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Williams County School District No. 8's internal control. Accordingly, we do not express an opinion on the effectiveness of Williams County School District No. 8's internal control. 8's internal control.

Our consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over financial reporting that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as described in the accompanying Schedule of Findings and Responses we identified certain deficiencies in internal control that we consider to be material weaknesses.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. We consider the deficiencies described in the accompanying Schedule of Findings and Responses as 2017-A, 2017-B, and 2017-C to be material weaknesses.

A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

www.eidebailly.com

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Williams County School District No. 8's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Williams County School District's Responses to Findings

Williams County School District No. 8's responses to the findings identified in our audit are described in the accompanying Schedule of Findings and Responses. Williams County School District No. 8's responses were not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on them.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Erde Barly LLP

Bismarck, North Dakota January 17, 2018

Section I – Financial Statement Findings

2017-A Preparation of Financial Statements Material Weakness

<u>Condition</u> – The District does not have an internal control system designed to provide for the preparation of the financial statements being audited. As auditors, we were requested to draft the financial statements and accompanying notes to the financial statements.

 $\underline{Criteria} - A$ good system of internal accounting control contemplates an adequate system for the preparation of the financial statements and related footnotes.

<u>Cause</u> – The District does not have staff trained in all GASB reporting standards.

Effect – The control deficiency could result in a misstatement to the presentation of the financial statements.

 $\underline{\text{Recommendation}}$ – The circumstance is not unusual in an organization of your size. It is the responsibility of management and those charged with governance to make the decision whether to accept the degree of risk associated with this condition because of cost or other considerations.

<u>View of responsible officials</u> – Since it is not cost-effective for an organization of our size to have staff to prepare audit-ready financial statements, we have chosen to hire Eide Bailly, a public accounting firm, to prepare the audit financial statements as part of their annual audit of Williams County School District.

2017-B Recording of Transactions and Audit Adjustment Material Weakness

<u>Condition</u> – We identified misstatements in the District's financial statements causing us to propose material audit adjustments.

<u>Criteria</u> - A good system of internal accounting control contemplates proper reconcilements of all general ledger accounts and adjustments of those accounts to the reconciled balances.

<u>Cause</u> – The District has a lack of internal controls over the recording of certain transactions.

<u>Effect</u> - Inadequate internal controls over recording of transactions affects the District's ability to detect misstatements in amounts that could be material in relation to the financial statements.

<u>Recommendation</u> – We recommend that all general ledger accounts are reconciled in a timely manner and adjustments made for any differences noted.

<u>View of responsible officials</u> - Management will make a greater effort to reconcile and record some of these transactions. It is not cost-effective for an organization of our size to have staff prepare all adjustments needed for an audit-ready trial balance; we have chosen to hire Eide Bailly, a public accounting firm, to assist us in preparing these transactions.

2017-C Segregation of Duties Material Weakness

Condition - The District has a lack of segregation of duties in certain areas due to a limited staff.

<u>Criteria</u> - A good system of internal accounting control contemplates an adequate segregation of duties so that no one individual handles a transaction from its inception to its completion.

<u>Cause</u> – The District has limited staff to be able to adequately segregate duties.

<u>Effect</u> - Inadequate segregation of duties could adversely affect the District's ability to detect misstatements in amounts that could be material in relation to the financial statements in a timely period.

<u>Recommendation</u> – While we recognize that your office staff may not be large enough to permit complete segregation of duties in all respects for an effective system of internal control, all accounting functions should be reviewed to determine if additional segregation is feasible and to improve efficiency and effectiveness of financial management of the District.

<u>View of responsible officials</u> – At this time, Williams County School District No. 8 has segregated the duties of all accounting functions in the most efficient manner possible given its limited staff and overload of office work due to the oil industry. The School Board is involved and is being kept informed of the financial management of the District.
