**INDEPENDENT AUDITOR’S REPORT ON COMPLIANCE WITH
REQUIREMENTS APPLICABLE TO PASSENGER FACILITY CHARGES
AND INTERNAL CONTROL OVER COMPLIANCE IN
ACCORDANCE WITH *PASSENGER FACILITY CHARGE GUIDE FOR PUBLIC AGENCIES***

To the Honorable Mayor and Members of the City Commissioners
Williston-Basin International Airport
Williston, North Dakota

Report on Compliance for Passenger Facility Charges Program

We have audited the compliance of the Williston-Basin International Airport, City of Williston, North Dakota, with the types of compliance requirements described in the *Passenger Facility Charge Audit Guide for Public Agencies* issued by the Federal Aviation Administration (the “Guide”) for its passenger facility charge program for the year ended December 31, 2020.

Management’s Responsibility

Management is responsible for compliance with the requirements of laws and regulations pertaining to the passenger facility charge program.

Auditor’s Responsibility

Our responsibility is to express an opinion on the Airport’s compliance based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the Guide. Those standards and the Guide require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on the passenger facility charge program occurred. An audit includes examining, on a test basis, evidence about the Airport’s compliance with those requirements and performing such other procedures, as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance with the program. However, our audit does not provide a legal determination of the Airport’s compliance with those requirements.

Opinion on Passenger Facility Charges Program

In our opinion, the Williston-Basin International Airport, City of Williston, North Dakota complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect to the passenger facility charge program for the year ended December 31, 2020.

Report on Internal Control Over Compliance

In planning and performing our audit, we considered the Airport's internal control over compliance with requirements that could have a direct and material effect on the passenger facility charge program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on the internal control over compliance in accordance with the Guide.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of the passenger facility program on a timely basis. *A material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of the passenger facility program will not be prevented, or detected and corrected, on a timely basis. *A significant deficiency in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance with a type of compliance requirement of the passenger facility charge program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the *Passenger Facility Charge Audit Guide for Public Agencies* issued by the Federal Aviation Administration (the "Guide"). Accordingly, this report is not suitable for any other purpose.

Report on Schedule of Passenger Facility Charge Revenue and Expenditures

We have audited the basic financial statements of the City of Williston, North Dakota as of and for the year ended December 31, 2020, and have issued our report thereon dated March 28, 2022, which contained a qualified opinion on the Governmental Activities, Business-Type Activities, Water Fund, Sewer Fund, and Aggregate Remaining Fund Information and an unmodified opinion on the General, Sales Tax, Capital Project Funds, 2016 Refunding Improvement Bonds, and 2017 BND Certificate. Our audit was performed for the purpose of forming an opinion on the financial statements as a whole. The accompanying schedule of passenger facility charges and related expenditures is presented for purposes of additional analysis, as specified in the Guide, and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from, and relates directly to, the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of passenger facility charges and related expenditures is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

This report is intended solely for the information of the City Commission, management, and the Department of Transportation and is not intended to be and should not be used by anyone other than these specified parties.
