

North Dakota Medicaid Provider Application Fees

Per CMS final rule 6028-F, state Medicaid programs must collect an application fee for new provider applications and during the revalidation process.

The following providers are exempt from an application fee:

- Individual providers, nonphysician practitioners, or sole proprietors enrolling under their social security number
- Providers who are enrolled with Medicare
- Providers who paid the application fee to either Medicare or another State Medicaid Agency within five (5) years of the new application or revalidation date
- Applicable provider types indicated in the matrix on the following page

The application fee for 2022 is \$631. The fee is established by the Centers for Medicaid and Medicare Services. Payment must be made in the form of a check to North Dakota Medicaid. This amount applies to any application or revalidation received on and after January 1, 2022 through December 31, 2022.

The matrix on the following pages indicates the application fee requirements by provider type. **Do not submit a check until requested by North Dakota Medicaid.**

Note: If you are not enrolled with Medicare or another State Medicaid agency, and you feel the application fee is overly burdensome, you may request a hardship waiver. Enrollment staff will provide hardship waiver details upon request.

Added 3/2/2021 JW:

Section 1866(j)(2)(C) of the Act requires the imposition of an application fee on each institutional provider "with respect to which screening is conducted," whenever the required screening (whether upon initial enrollment, reactivation, or reenrollment) occurs. Since the imposition of an application fee is based on when the screening occurs collect the fee when the revalidation takes place.

Group Application Fee Requirements
