Superintendent's Foreword

Our North Dakota public schools endeavor to provide a well-rounded education for our students. This task goes well beyond offering traditional instruction in reading, writing, and mathematics. Our young people also should recognize the beauty, transcendence, and creative value of the arts – music, dance, media, theatre, and the visual arts.

These newly developed arts standards, drafted with pride and affection by teams of North Dakota educators, will broaden the learning horizons for our students. The arts are an indispensable element for demonstrating our common humanity. They give our students new and unique ways for expressing themselves, for learning and understanding other subjects, and for developing more imaginative and innovative ways of thinking. These standards will aid our North Dakota students as they become more fully formed members of our state, nation, and world.

The North Dakota Constitution recognizes the importance of public education in nurturing prosperity, happiness, and a “high degree of intelligence, patriotism, integrity and morality.” Statewide academic content standards help us to reach these noble objectives. These new standards in the arts give us the tools to provide equitable educational opportunity statewide.

While these North Dakota standards represent a statewide reference point for teaching the arts in classrooms, local school districts are encouraged to use them as a guide for developing their own local, customized curriculum.

The work on these new standards began in January 2018 and continued throughout the year. The writing committee's drafts were made available for public comment, which generated useful opinions from teachers, administrators, parents and the community.

A panel of business people, community leaders, and representatives of the general public provided another layer of review and feedback. I am grateful to those who devoted their time and talents to review the draft standards and provide their recommendations to the writing committee.

No one is better qualified to prepare arts standards for our schools than our own educators. This document is an exemplar of the best in North Dakota education – North Dakota teachers writing statewide standards in an open, transparent and diligent manner.

Each member of the arts writing teams deserve our thanks for their extensive research, analysis and deliberation. Thanks to their work, these standards are ready to be used in our classrooms across the state.

North Dakota Arts Content Standards Introduction

The North Dakota Arts Content Standards (2019) articulate what students are expected to know and apply when creating, presenting, responding, and connecting to the arts. Framed within four Artistic Processes (Create, Perform/Produce/Present, Respond, and Connect), the arts standards consist of a set of eleven anchor standards common to all five arts disciplines. The standards build from kindergarten through high school with increasing depth and complexity. These standards were written by a diverse team of North Dakota elementary, secondary, and post-secondary educators, under the guidance of the State Superintendent with technical assistance from North Central Comprehensive Center at McREL International. The writing process was informed by reviewing previous North Dakota standards along with other state/national standards, resources, and multiple public reviews.

Implementation of these standards will guide the development of artistic literacy needed to fully engage in the arts. This involves an understanding of the artistic processes that goes deeper as knowledge and experience increases.

Music Introduction

The 2019 North Dakota Music Standards closely follow the format of the 2014 National Music Standards.

The knowledge and skills emphasized in the previous North Dakota Music Content Standards (2000) are integrated into the 2019 Music Standards. Additionally, the 2019 Music Standards focus on progressively sequenced artistic processes which incorporate 21st Century Skills and higher-level thinking.

Unique to the music standards is the organizational structure which includes two distinct sets of standards:

- Elementary Music (Grades K-6)
- Secondary Music (includes middle and high school)

The standards include anchor standards that express overall expectations across grade level with performance standards articulated by grade level. The anchor standards are clustered around the processes of:

- **Creating:** Creating and developing new artistic ideas and work.
- **Performing:** Realizing artistic ideas and work through interpretation and presentation. Performing (Dance, Music and Theatre)/Producing (Media Arts)/Presenting (Visual Arts)
- **Responding:** Understanding and evaluating how the arts convey meaning.
- **Connecting:** Relating artistic ideas and work with personal meaning and external context.

Notes Regarding Secondary Music Standards

Secondary music courses often do not align to specific grade levels, necessitating a leveling process focused on abilities and experience rather than age or grade level range. These standards should be used for both ensemble and non-ensemble courses.

The Secondary Music Content Standards indicate appropriate proficiencies for three levels of ability and experience:

- Beginning Standards
- Intermediate Standards
- Accomplished Standards

For instructors to teach the standards to grade level, the National Association for Music Education (NAfME) Music Program Leaders have created checklists for General Music, General K-12, and Specialized Areas Including Ensembles. These checklists provide an advocacy tool for evaluating your music program including: curriculum, scheduling, staffing, professional development, evaluation, materials and equipment, facilities, and technology.

The Model Cornerstone Assessments (MCAs) provide an instructional and assessment framework into which teachers integrate their curriculum to help measure student learning.

Key Components of this Document

Artistic Processes are the cognitive and physical actions by which arts learning and making are realized. These processes define and organize the link between the art and the learner. The arts processes are Create, Perform/Produce/Present, Respond, and Connect.

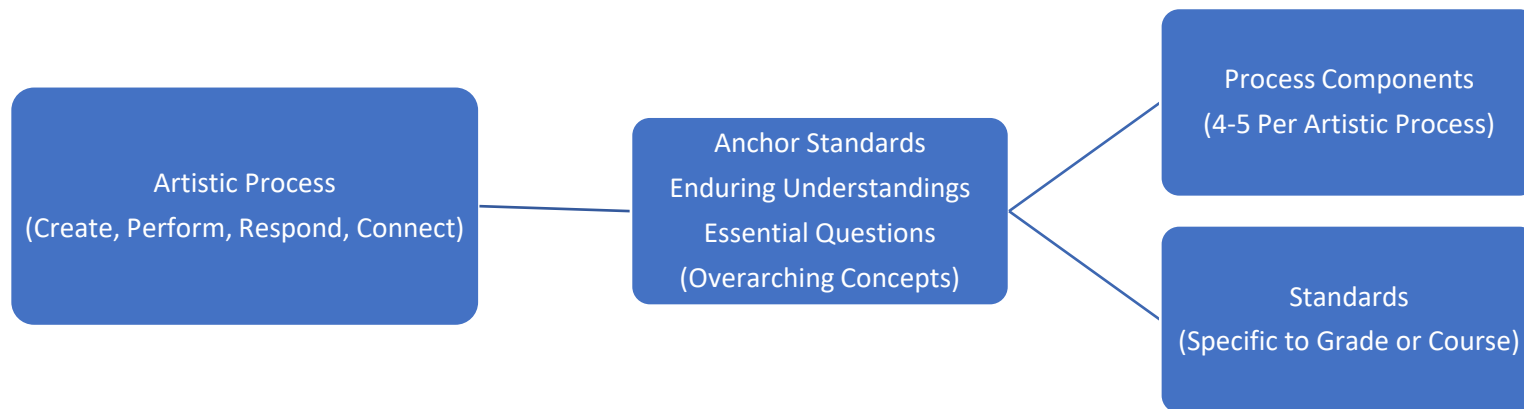

Anchor Standards describe the general knowledge and skills teachers expect students to demonstrate throughout their education and the arts. These serve as the tangible educational expression of artistic literacy.

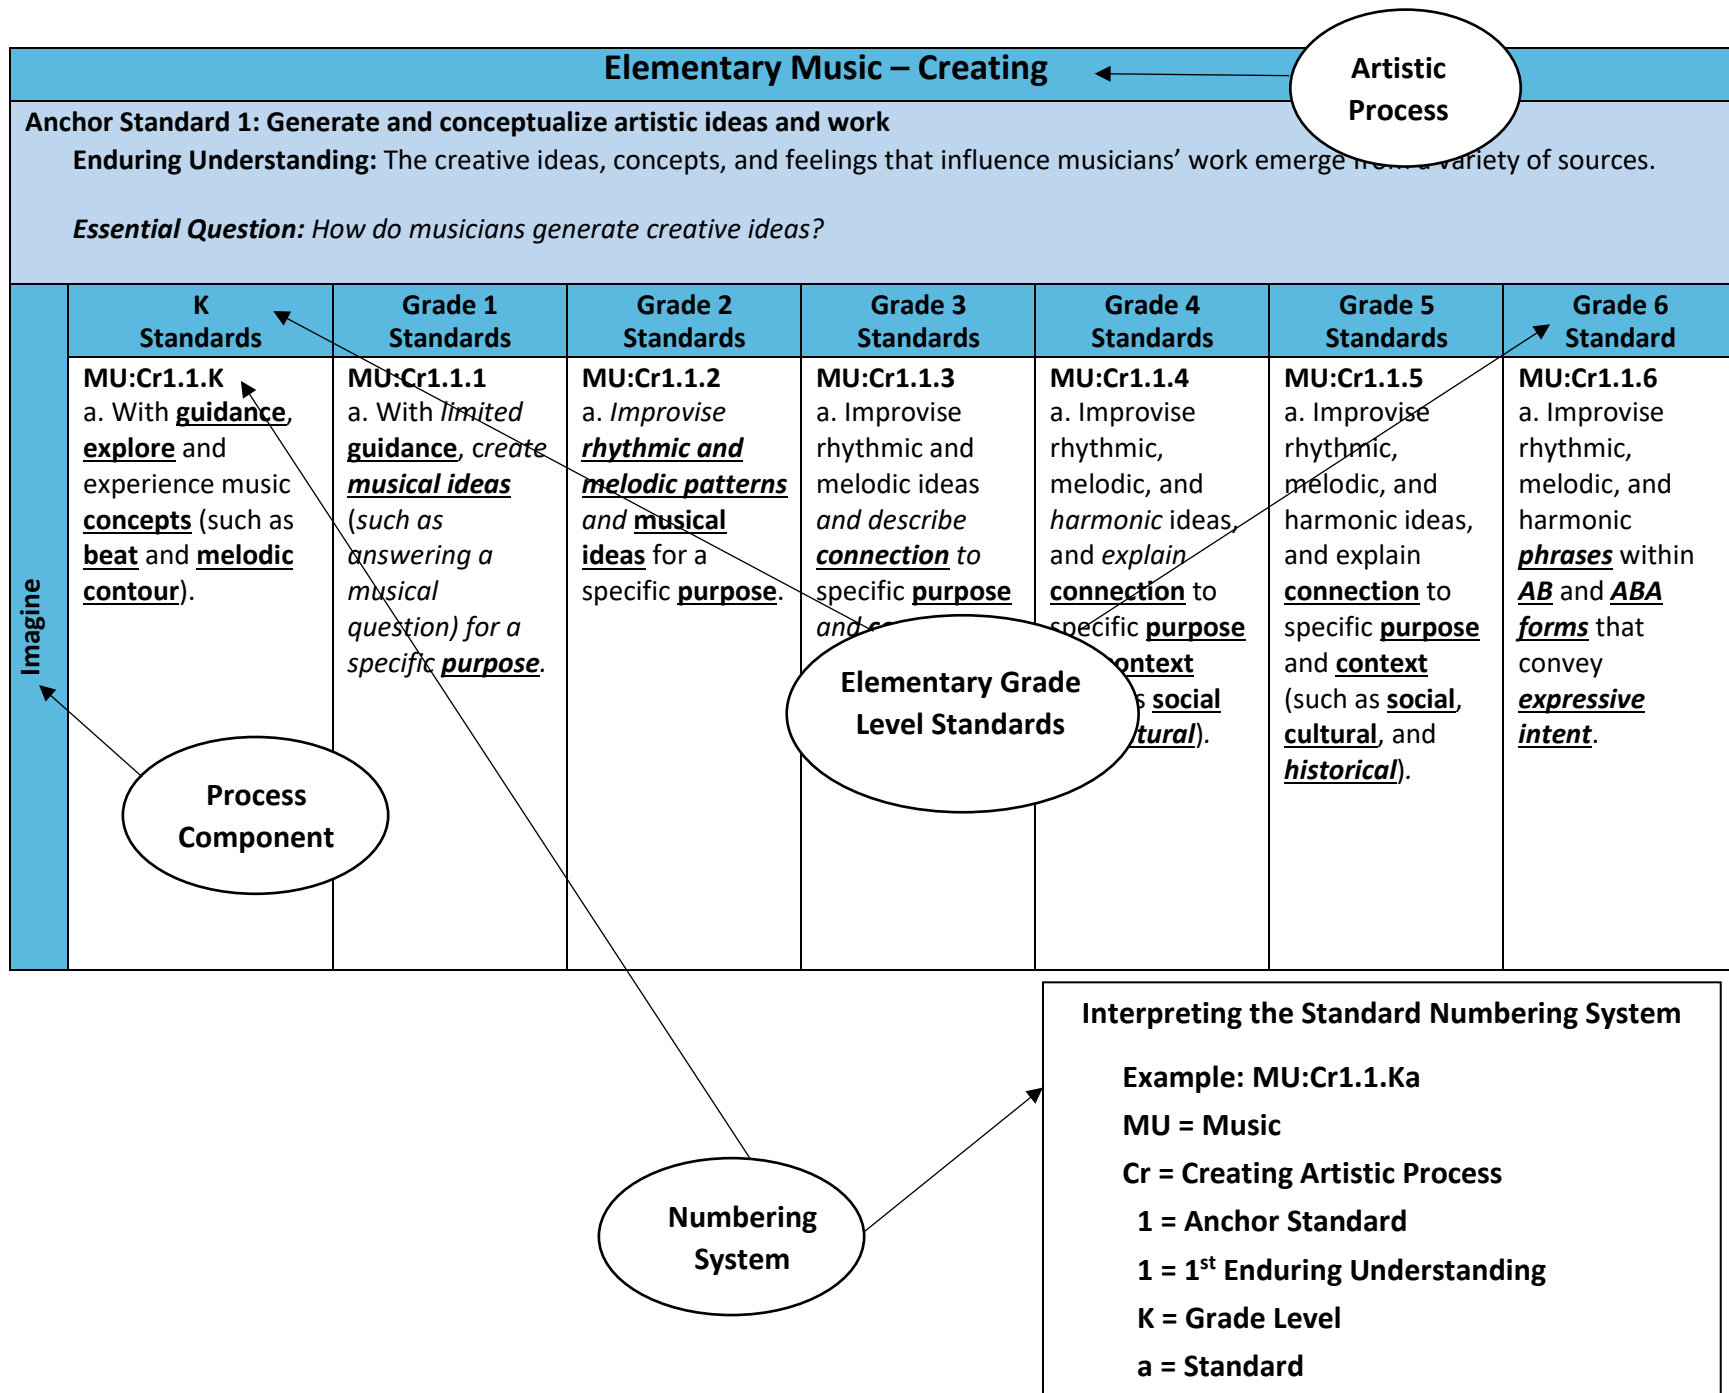

Enduring Understandings are statements summarizing important ideas and processes central to a discipline and have lasting value beyond the classroom. They synthesize what students should come to understand because of studying a certain content area. Enduring understandings should also enable students to make connections to other disciplines beyond the arts.

Essential Questions guide students as they uncover enduring understandings. They are questions that encourage, hint at, and even demand transfer beyond the topic in which students first encounter them. Therefore, essential questions should recur over the years to promote conceptual connections and curriculum coherence.

Process Components are actions artists carryout as they complete each artistic process. These play a key role in generating enduring understandings and grade/course standards.

Standards are discipline-specific (dance, media arts, music, visual arts, theatre), grade-by-grade or course-by-course articulations of student achievement.
