

BPS Curriculum Resources Aligned to Pillars of Reading								
5 Pillars + Oral Language & Writing	<p>To achieve the desired student outcomes defined we provide instruction using evidence-based instructional methods and resources. Instruction is anchored to our guaranteed and viable curricular program which includes resources to support students in reaching proficiency of the North Dakota ELA Standards. Resources include materials and lessons supporting systematic, direct instruction of the Five Pillars of Science Based Reading Instruction (Phonemic Awareness, Phonics, Fluency, Vocabulary and Comprehension along with Oral Language and Writing). An on-going curriculum review cycle is utilized to review curricular resources and identify gaps. Supplemental materials may be added to fill in in areas that are lacking in the essential components needed for effective teaching of reading and writing based on data and teacher feedback. Core resources will be evaluated when the current ND ELA standards are revised and published.</p>
