Superintendent’s Foreword

Our North Dakota public schools endeavor to provide a well-rounded education for our students. This task goes well beyond offering traditional instruction in reading, writing, and mathematics. Our young people also should recognize the beauty, transcendence, and creative value of the arts – music, dance, media, theatre, and the visual arts.

These newly developed arts standards, drafted with pride and affection by teams of North Dakota educators, will broaden the learning horizons for our students. The arts are an indispensable element for demonstrating our common humanity. They give our students new and unique ways for expressing themselves, for learning and understanding other subjects, and for developing more imaginative and innovative ways of thinking. These standards will aid our North Dakota students as they become more fully formed members of our state, nation, and world.

The North Dakota Constitution recognizes the importance of public education in nurturing prosperity, happiness, and a “high degree of intelligence, patriotism, integrity and morality.” Statewide academic content standards help us to reach these noble objectives. These new standards in the arts give us the tools to provide equitable educational opportunity statewide.

While these North Dakota standards represent a statewide reference point for teaching the arts in classrooms, local school districts are encouraged to use them as a guide for developing their own local, customized curriculum.

The work on these new standards began in January 2018 and continued throughout the year. The writing committee’s drafts were made available for public comment, which generated useful opinions from teachers, administrators, parents and the community.

A panel of business people, community leaders, and representatives of the general public provided another layer of review and feedback. I am grateful to those who devoted their time and talents to review the draft standards and provide their recommendations to the writing committee.

No one is better qualified to prepare arts standards for our schools than our own educators. This document is an exemplar of the best in North Dakota education – North Dakota teachers, writing statewide standards in an open, transparent and diligent manner.

Each member of the arts writing teams deserve our thanks for their extensive research, analysis and deliberation. Thanks to their work, these standards are ready to be used in our classrooms across the state this fall.

North Dakota Arts Content Standards Introduction

The North Dakota Arts Content Standards (2019) articulate what students are expected to know and apply when creating, presenting, responding, and connecting to the arts. Framed within four Artistic Processes (Create, Perform/Produce/Present, Respond, and Connect), the arts standards use a set of eleven anchor standards common to all five arts disciplines. The standards build from kindergarten through high school with increasing depth and complexity. These standards were written by a diverse team of North Dakota elementary, secondary, and post-secondary educators, under the guidance of the State Superintendent with technical assistance from the North Central Comprehensive Center at McREL International. The writing process was informed by reviewing previous North Dakota standards along with other state/national standards, resources, and multiple public reviews.

Implementation of these standards will guide the development of artistic literacy needed to fully engage in the arts. This involves an understanding of the artistic processes that goes deeper as knowledge and experience increases.

Media Arts Introduction

The media arts standards are intended for all those in North Dakota involved in the education and support of young people, whether they are career and technical teachers, classroom teachers, media professionals, or other stakeholders involved in media and the arts. It is the hope that the standards will support collaborative efforts to include media arts into the world of learning, academics, and other disciplines.

Media arts integrates the traditional forms of artistic expression incorporating electronic media in a technology-driven world. Media arts are recognized as those that use electronic media, including, but not limited to, film, photography, graphic design, animation and digital media. The tools and techniques have evolved throughout the decades and are changing at a rapid pace in the digital age; however, the goal to confer meaning through the media arts remains the same. For example, works of art involving animation and video are not constrained to TV and Film. The internet society often uses animation and video media as short as a few seconds to impart their message. Media arts are not just used in works involving motion. Two-dimensional (2D) art, like digital painting, photography, and graphic design to make logos, are also part of the media arts discipline, processes involved, multiple artists often collaborate on a work in the media arts.

The content and standards processes may be used for support and guidance of overall curriculum development and school improvement. The first section defines Anchor Standards, Essential Questions, and Enduring Understandings for each grade level. The second section defines grade level expectations including all anchor standards for that specific grade level. The final section is a glossary. The glossary is meant to clarify questions on specific terms that are bolded and underlined.
The standards include anchor standards that express overall expectations across grade level with performance standards articulated by grade level. The anchor standards are clustered around the processes of:

- **Creating**: Creating and developing new artistic ideas and work
- **Producing (Media Arts)**: Interpreting and sharing artistic work. Performing (Dance, Music and Theatre) /Producing (Media Arts)/Presenting (Visual Arts)
- **Responding**: Understanding and evaluating how the arts convey meaning.
- **Connecting**: Relating artistic ideas and work with personal meaning and external context.

Each Anchor Standard includes Enduring Understandings and Essential Questions that address important concepts and ideas implicit in the standards.

Words underlined and bolded can be found in the glossary at the end of the document. **This document is best printed on legal size paper.**
Key Components of this Document

*Artistic Processes* are the cognitive and physical actions by which arts learning and making are realized. These processes define and organize the link between the art and the learner. The arts processes are: create, produce, respond, and connect.

*Anchor Standards* describe the general knowledge and skills teachers expect students to demonstrate throughout their education and the arts. These serve as the tangible educational expression of artistic literacy.

*Enduring Understandings* are statements summarizing important ideas and processes that are central to a discipline and have lasting value beyond the classroom. They synthesize what students should come to understand because of studying a specific content area. Enduring understandings should also enable students to make connections to other disciplines beyond the arts.

*Essential Questions* guide students as they uncover enduring understandings. They are questions that encourage, hint at, even demand transfer beyond the specific topic in which students first encounter them. Therefore, essential questions should recur over the years to promote conceptual connections and curriculum coherence.

*Process Components* are the actions artists carry out as they complete each artistic process. These play a key role in generating enduring understandings and grade/course standards.

*Standards* are discipline-specific (dance, media arts, music, visual arts, theatre), grade-by-grade or course-by-course articulations of student achievement.
**Anchor Standard 1: Generate and conceptualize artistic ideas and work**

**Enduring Understanding:** Media arts ideas, works, and processes are shaped by the imagination, creative processes, and by experiences, both within and outside of the arts. The elements of media are used in the creative production of media arts.

**Essential Question(s):** How do media artists generate ideas? How can ideas for media arts productions be formed and developed to be effective and original?
