11301	Mathematics 1	1	Mathematics (grade 1) helps build a conceptual foundation in number, operation, and quantitative reasoning; patterns, relationships, and algebraic thinking; geometry and spatial reasoning; and measurement. This course often requires students to develop their numerical fluency and to make calculation predictions. Specific content depends upon state standards for grade 1.	License Code: 50015-Elementary Educ. ♦ K-8 or 1-8 OR 50037-Early Childhood ♦ B-3  <b>NOTE: The 50037 Early Childhood degree allows a teacher to teach students in prekindergarten to grade 3 only.</b>
11302	Mathematics 2	2	Mathematics (grade 2) continues to build a conceptual foundation in number, operation, and quantitative reasoning; patterns, relationships, and algebraic thinking; geometry and spatial reasoning; and measurement. This course often requires students to develop their numerical fluency, particularly in addition and subtraction, and to solve problems using those operations as well as estimation. Specific content depends upon state standards for grade 2.	
11303	Mathematics 3	3	Mathematics (grade 3) emphasizes number, operation, and quantitative reasoning; patterns, relationships, and algebraic thinking; geometry and spatial reasoning; and measurement. This course often requires students to improve their numerical fluency, adding multiplication and division to addition and subtraction operations, using whole numbers and parts (quarters, thirds, halves), and estimation. Specific content depends upon state standards for grade 3.	
11304	Mathematics 4	4	Mathematics (grade 4) emphasizes number, operation, and quantitative reasoning; patterns, relationships, and algebraic thinking; geometry and spatial reasoning; and measurement. Course content may include activities that help students increase operational fluency, make connections between abstract symbols and concrete events or concepts, or present conclusions based on data. Specific content depends upon state standards for grade 4.	License Code: 50015-Elementary Educ. ♦ K-8 or 1-8

<b>SCIENCE</b>				
13301	Science 1	1	Science (grade 1) allows students to identify interactions and patterns in objects and events and to record observations in written or visual form. Typically, students investigate systems of living organisms and the environment. Specific content depends upon state standards for grade 1.	License Code: 50015-Elementary Educ. ♦ K-8 or 1-8 OR 50037-Early Childhood ♦ B-3  <b>NOTE: The 50037 Early Childhood degree allows a teacher to teach students in prekindergarten to grade 3 only.</b>
13302	Science 2	2	Science (grade 2) continues to introduce students to basic scientific processes and principles. Course content may include identification of patterns, classification and sequencing, or manipulation of systems to observe interactions between parts and record the effects of change. Specific content depends upon state standards for grade 2.	
13303	Science 3	3	Science (grade 3) involves observation, measurement, and description of simple systems. Course content may include the scientific process; life and environmental science; and physical, earth, and space science. Specific content depends upon state standards for grade 3.	
13304	Science 4	4	Science (grade 4) typically explores complex systems, such as plant and animal adaptation, forces and motion, and physical and chemical changes in matter, or content consistent with state academic standards. Other course content may include concepts of biology, geology, and astronomy. Students may identify causes and effects of change, make predictions, and gather data from multiple sources. Scientific inquiry may contain concepts of technological design. Specific content depends upon state standards for grade 4.	License Code: 50015-Elementary Educ. ♦ K-8 or 1-8
13305	Science 5	5	Science (grade 5) builds on the study of various systems. It may include identification and description of cycles, comparisons of forms of matter and energy, forces, or content consistent with state academic standards. Other course content may include concepts of biology, geology, and astronomy. Students may make comparisons and interpret and analyze information. Scientific inquiry may contain concepts of technological design. Specific content depends upon state standards for grade 5. <b>SOCIAL STUDIES (Continued)</b>				
15311	Social Studies 1	1	Social Studies (grade 1) develop foundational skills in the social studies disciplines: history, geography, civics and government, economics, and personal finance. These disciplines are often taught together and organized around a theme. Specific content depends upon state standards for grade 1.	License Code: 50015-Elementary Educ. ♦ K-8 or 1-8 OR 50037-Early Childhood ♦ B-3  <b>NOTE: The 50037 Early Childhood degree allows a teacher to teach students in prekindergarten to grade 3 only.</b>
15302	Social Studies 2	2	Social Studies (grade 2) help students reach greater understanding of the social studies disciplines: history, geography, civics and government, economics, and personal finance. This course often offers study of these disciplines in an integrated fashion, through the context of a specific theme or discipline, such as state-based social studies or the history of a people and culture. Specific content depends upon state standards for grade 2.	
15303	Social Studies 3	3	Social Studies (grade 3) build on previous knowledge and introduce concepts in the social studies disciplines: history, geography, civics and government, economics, and personal finance. Instruction of the disciplines is often integrated for instructional purposes. Students may study these disciplines through the context of a specific theme or discipline, such as state-based social studies or U.S. history and culture. Specific content depends upon state standards for grade 3.	
15304	Social Studies 4	4	Social Studies (grade 4) continue to develop skills in history, geography, civics and government, and economics. Although the four disciplines are typically integrated, this course may take a more discipline-specific approach, such as concentrating on U.S. history, state-specific history, economics, timelines, exploration, government, geography and citizenship or civic engagement for periods of time. Additional content may include personal finance. Specific content depends upon state standards for grade 4.	License Code: 50015-Elementary Educ. ♦ K-8 or 1-8
15305	Social Studies 5	5	Social Studies (grade 5) continue to develop skills in history, geography, civics and government, economics, and personal finance. This course may be more discipline-specific (dividing up state history, U.S. history, geography, government, and so on). Specific content depends upon state standards for grade 5.	License Code: 50015-Elementary Educ. ♦ K-8, or 1-8 OR 50217-Middle School Social Studies Major Equivalency ♦ 5-8 OR 50017-Middle School ♦ 5-8
15306	Social Studies 6	6	Social Studies (grade 6) provide a greater understanding of social studies disciplines, including history, geography, civics and government, and economics. This course often focuses on the history, culture, and World History: Prehistory to Renaissance including early economics and finance. Typically, students develop skills used in the social studies disciplines. Specific content depends upon state standards for grade 6.

10401	STEM 1	1	<p>Elementary education teachers who use STEM lessons that introduce creativity and innovation can help students with career exploration and development. Students are inspired to take an early look at opportunities and occupations like alternative energy, green transportation, engineering, technology, mathematics, and science to name a few.</p> <p>The increased dependence on technology will require all students to have a solid foundation in the STEM disciplines. Through hands-on, problem and project-based learning, that emphasizes critical thinking and problem solving, students will be preparing for the 21st century workforce.</p> <p>An emphasis on design and problem solving in the classroom will allow students to use cross-disciplinary tools for discovery and for developing solutions to problems that are open-ended (allowing for interactive steps, rather than highly structured patterns). Such a classroom would give students an understanding of the relationships of STEM areas as they are used in the real world beyond the classroom walls.</p>	<p>License Code: 50015-Elementary Educ. ◆ K-8 or 1-8 <b>OR</b> 50037-Early Childhood ◆ B-3</p> <p><b>NOTE: The 50037 Early Childhood degree allows a teacher to teach students in prekindergarten to grade 3 only.</b></p>

<b>TECHNOLOGY - continued</b>				
10103	PLTW GTT Foundations	6	This is a Project Lead the Way Gateway to Technology (GTT) course that consists of the Automation and Robotics, Design and Modeling and Energy and the Environment units. Students trace the history, development and influence of automation and robotics by designing, building and program solutions to existing problems. Students are introduced to and use the design process to solve problems and understand its effect on our lives. Students will also investigate the impact of energy on our lives and on the environment and evaluate energy consumption, efficiency and sustainability.	License Code: 10108-Project LEAD the WAY Endorsement (GTT Foundations) ◆ 5-12
10104	Exploring Technology	6	Exploring Technology prepares students with an understanding of what is technology, the universal systems model, and opportunities to apply the engineering design process in problem solving. Students have opportunities to study the scope of technology and its impacts on society. They learn about the core concepts of technology and about the various approaches to solving problems, including engineering design and experimentation. Students are involved in activities and experiences where they learn about brainstorming, visualizing modeling, constructing, testing, experimenting, and refining designs. Students also develop skills in researching for information and communicating design information. A state recommended course guide is available.
