

Medication Administration Training for School Personnel

Minnesota State Community and Technical College announces two training options

*** Online**

*** Onsite**

*** Online:**

This 4 hour online training course will provide North Dakota school personnel basic knowledge of medication administration in order to safely provide medications to students in the school setting.

Successful completion of this online training course will require the participant to view a lecture/slide presentation, handouts, skill demonstration videos, complete a post test, and demonstrate 8 medication administration skills in the presence of a Registered Nurse currently licensed in North Dakota and identified by the employing school of the course participant.

The online option gives the participant the opportunity to work at their own pace and access to the course materials for a period of two weeks. Within 4 weeks of the course start date, the completed course paperwork must be received in our office in order to receive a certificate of completion.

Course fee: \$50 per person

Online sessions: Offered monthly

Register for the online class at <http://www.minnesota.edu/?id=20411> or contact: *Denice Brewer* by phone (218) 299-6576 or (800) 426-5603 ext. 6576 or email (denice.brewer@minnesota.edu).

*** Onsite:**

Please contact Denice Brewer at (218) 299-6576 or (800) 426-5603 ext. 6576 (denice.brewer@minnesota.edu) to discuss and arrange onsite training for your school staff.
