

SRSA Allocation Formula:

To project your LEA's SRSA supplemental allocation, you will need to know the LEA's ADA, and the amount of Title IIA and Title IVA funding the LEA received 2 fiscal years prior. (Ex: for 2019-2020, use 17-18 allocations)

To Calculate:

- Take the ADA
- Subtract 50
- Multiply the total by \$100
- Add \$20,000 to the sum

(The total above is capped at \$60,000)

- Subtract the sum of the allocations received from Title II and IV
- This will give your projected SRSA grant allocation for the year

The projected amount may be ratably reduced or increased, depending on the amount appropriated by Congress for the program and the number of eligible LEAs.
