Introduction

The North Dakota music content standards articulate the knowledge and skills that students should know and be able to do when creating, performing, and responding to music. Framed within the Artistic Processes (Create, Perform, Respond, and Connect) the music standards use the eleven anchor standards found in all the arts areas. While these new standards may appear quite different, the previous nine music standards are included within these processes. Along with understanding the tradition of music as human expression throughout history and across cultures, these standards focus on engaging with conceptual understandings and skills that reflect the actual creative processes in which musicians engage.

Unique to the music standards is the organizational structure which includes two distinct sets of standards. These sets are:

- Elementary Music (Grades K-6)
- Secondary Music (includes middle and high school)

Notes Regarding Secondary Music Standards

Secondary music courses often do not align to specific grade levels, necessitating a leveling process focused on abilities and experience rather than age or grade level range. These standards should be used for both ensemble and non-ensemble courses.

The Secondary Music Content Standards indicate appropriate proficiencies for three levels of ability and experience:

- Beginning Standards
- Intermediate Standards
- Accomplished Standards

The 2018 North Dakota Music standards were developed referencing a variety of sources including state and national music standards. The format closely follows the 2014 National Music Standards.

It is important to note that the standards have the following embedded into them:

- The 2000 North Dakota Music Standards
- 21st Century Skills

These standards are written to indicate proficiency at the end of the grade or level. All content areas share the same 11 anchor standards, with the degree of depth and complexity increasing throughout grades or levels.

Resources:[Opportunity-to-Learn Standards](#)

In order to teach the standards to grade level, the National Association for Music Education (NAfME) Music Program Leaders have created checklists for General Music, General K-12, and Specialized Areas Including Ensembles. These checklists provide an advocacy tool for evaluating your music program including: curriculum, scheduling, staffing, professional development, evaluation, materials and equipment, facilities, and technology.

[Model Cornerstone Assessments](#)

The Model Cornerstone Assessments (MCAs) provide an instructional and assessment framework into which teachers integrate their curriculum to help measure student learning.

Key Components of this Document

Artistic Processes are the cognitive and physical actions by which arts learning and making are realized. These processes define and organize the link between the art and the learner. The arts processes are Create, Perform/Produce/Present, Respond, and Connect.

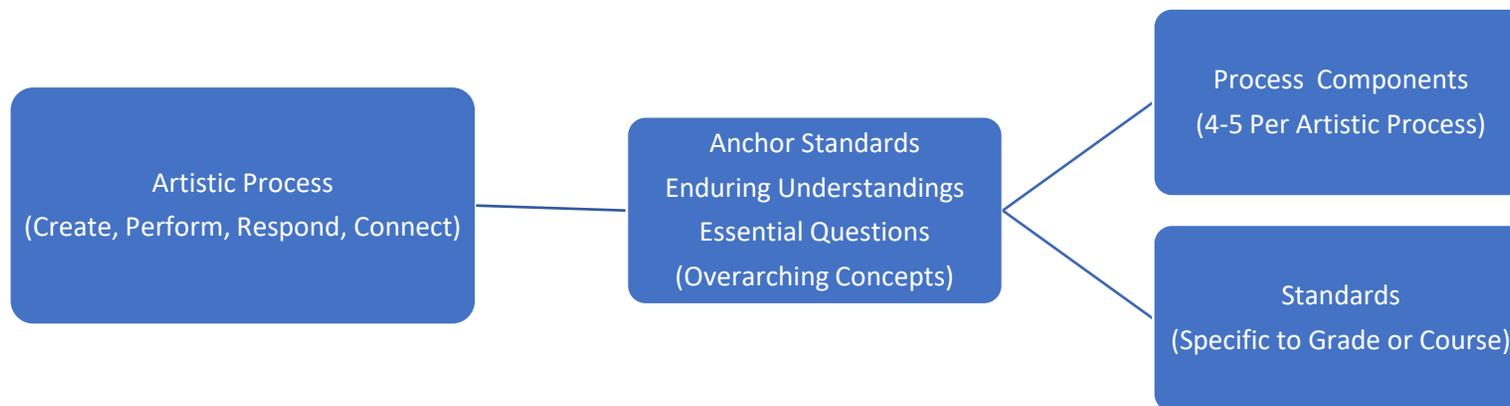

Anchor Standards describe the general knowledge and skill that teachers expect students to demonstrate throughout their education and the arts. These serve as the tangible educational expression of artistic literacy.

Enduring Understandings are statements summarizing important ideas and processes that are central to a discipline and have lasting value beyond the classroom. They synthesize what students should come to understand as a result of studying a particular content area. Enduring understandings should also enable students to make connections to other disciplines beyond the arts.

Essential Questions guide students as they uncover enduring understandings. They are questions that encourage, hint at, even demand transfer beyond the particular topic in which students first encounter them. Therefore, essential questions should recur over the years to promote conceptual connections and curriculum coherence.

Process Components are the actions artists carry out as they complete each artistic process. These play a key role in generating enduring understandings and grade/course standards.

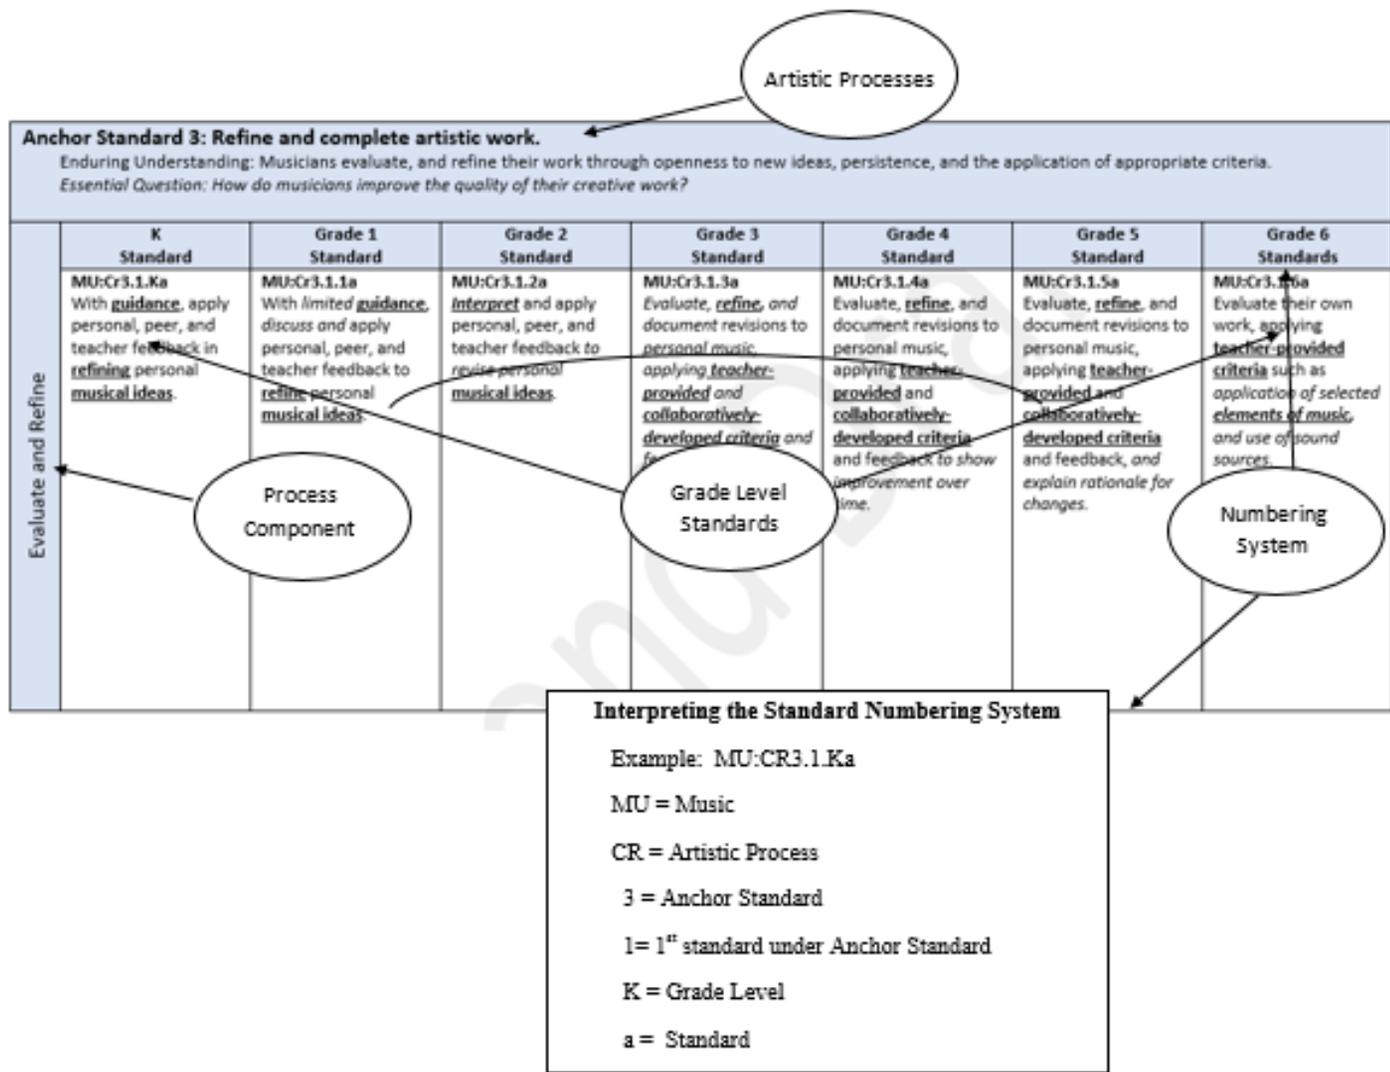

Standards are discipline-specific (dance, media arts, music, visual arts, theatre), grade-by-grade or course-by-course articulations of student achievement.

This chart demonstrates the higher level thinking skills that are found in multiple Artistic Process Components. The different colors indicate where the Process Components occur in more than one Artistic Process.
