EA Activity Update

Technology Architecture [Met October 8,2015](#)

- Windows 10 test site moving, IE11 and other browsers, discussed MDM, discussed the Application Suite standard

Security Architecture [Met October 6,2015](#)

- Discussed AV software, challenge questions in a standard, securing web browsers, and request managers responsibilities in WMS

Data Architecture [Met October 1,2015](#)

- Discussed data classification, or 'Data Sensitivity'

Application Architecture [Met October 13,2015](#)

- Continued work on Web Development standard and best practices, and discussed web browsers

ITD Activity Update

- ITD Annual Report
- Governor's Cybersecurity Task Force
- Cybersecurity Awareness Month
- BND using HEAT for CMDB
- Avaya Voicemail upgrade

Email Whitelisting

- Discussion about the requirements, current technology, and if needed, future technology
- Related topic...how to we address requests from agencies for enterprise products or services?
 - Used to use the EA Request for Technical Analysis
 - Is what we really need...a Charter/Business Case?
 - Would that route to ITCC?

- After January 12, 2016, Microsoft will support IE9 only on Windows Vista, IE10 only on Windows Server 2012, and IE11 on Windows 7 and Windows 8.1
- IE7 and IE8 will drop off support completely, no matter what OS they run on
- Agencies must be prepared to stop using older versions by that date
- Windows 10 includes IE 11 and Edge. Edge will have the 'Evergreen' method of updating as fixes are available and will not have major point releases like IE.
- Are agencies standardized on IE?
- What other browsers are you using or considering?
- The current Desktop Suite standard specifies IE as the "Standard for internal Enterprise applications?"

A Recap of the 2015-10-12 UAS workshop

Future Agenda Items?
