### 1. gpTRAC Presentation – Mary DeVany

- Mary DeVany presented on the “Next Generation” of Telehealth Services.
- The environment is changing and there are increased needs, expectations and technologies.
- New telehealth is becoming more appealing and people are becoming more comfortable with it.
- Traditional services are expanding their service locations such as residential or group homes, assisted living centers, workplace-based and school-based clinics.
- Non-traditional services are expanding to provide substance abuse treatment programs.
- There are many challenges around licensure and practice standards regulations.
- Mary will gather some resources to share with the group on products and videos specific to telehealth training.

### 2. Next Steps

- Would like NDPERS and Sanford Health present to this group regarding the parity bill.
