Subject: Vulnerability in WordPress Mobile Detector Plugin Could Allow for Remote Code Execution
Importance: High

There are reports of this vulnerability being actively exploited in the wild.

WordPress Mobile Detector is used to display content on WordPress sites in a format suitable for phones and tablet devices.

This may allow an attacker access to sensitive information and compromise the system.

Compliance Sheriff

ITD can scan agency websites using Compliance Sheriff.

Drupal 8

- **Drupal 6** - Reached end of life on 2/24/16.

- **Drupal 7** - Support will end several months after release of Drupal 9, est. 2020

- **Drupal 8** – Released in November, 2015. ITD is currently evaluating maturity of core and modules.

Screen capture software

Use free software and inexpensive equipment (<$100) to create high-quality instructional videos

Open Broadcaster Software
