

How to merge waypoint files

1. Open Alltopo
2. Click on **“Annotations”**
3. Click on **“Edit Annotation Source”**
4. Click **“Edit”** then **“Insert File”** keep clicking edit and inserting as many files as you would like (Try not to make them too large, 200k pts. Or larger might take a while to load)
5. When you are finished adding files click **“File”** and then **“Save As”** name your file and click **“Save”**

You have now merged multiple files together and can view them in the same map😊
