

Using the Datalogger

Note: Make sure your GPS unit is turned on and receiving 3 satellite signals.

When using with a flow switch:

- 1) The switch on the Datalogger (if equipped) should be in the "OFF" position.
- 2) The LED should only light up when spraying.

When using the datalogger to spray manually:

- 1) Switch the Datalogger to "ON" position.
- 2) Push the desired "Weed" button.
- 3) Wait a few seconds...
- 4) Switch the Datalogger to the "OFF" position.
