	Cows (≥ 36 month of age)	Cows (JD Test Positive)	Cows (JD Clinical Cases)	Bred Heifers (will not be reimbursed)	Bulls (≥ 24 months of age)
Inventory					
New Additions					
Culls and Deaths (previous 12 months)					

How do you obtain replacements? (home raised, market, single owner)

Area of operation responsible for the major source or risk and/or spread of Johne's

CHECK ALL BOXES THAT APPLY

Calving Area:

- ☐ Use individual calving pens that are cleaned after each use.
- ☐ Keep calving area clean and dry.
- ☐ Keep adult cow manure away from calves.
- ☐ Do not use calving pens for sick cows or cows that are JD test positive.
- ☐ Remove cow-calf pair from calving area immediately after calves are born.
- ☐ Adequate square feet / pair.
- ☐ Collect colostrum under sanitary conditions.

Pre-weaned Calves:

- ☐ Access to fresh water vs. stockdam / water hole / slough.
- ☐ Sick animals segregated from healthy ones.
- ☐ Feeding areas clean.
- ☐ Prevent contact with cows that are JD test positive.
- ☐ Provide adequate pasture space.
- ☐ Prevent manure contamination of feed storage.

Weaned calves and bred heifers:

- ☐ Minimize contact with adult cows or cow manure.
- ☐ Remove cow manure from all equipment before using in heifer areas.
- ☐ Heifers obtained from known source.
- ☐ Do not allow heifers to share water, feed, housing, feed bunks or pasture with cows.
- ☐ Prevent heifers from grazing / consuming feed with manure spread on in the past 12 months.

Adult cows and bulls:

- ☐ Avoid spreading manure on hay ground or pasture.
- ☐ Avoid manure contamination of feed storage areas or feeding equipment.
- ☐ Isolate or cull cows that are JD test positive.

Replacements:

- ☐ Management herds - Purchase replacements from herds with known negative JD status.
- ☐ Status herds - Purchase replacements according to guidelines for negative Status Herds.
