

WILDLIFE TECHNICIAN

SCOPE OF WORK:

Work is associated with the construction, operation, and maintenance of state controlled wildlife and fish management areas and facilities.

DUTIES PERFORMED AT ALL LEVELS:

- Assist in the collection, recording, and analysis of biological data for fish or wildlife studies.
- Operate and maintain motor vehicles, powerboats, facilities, and specialized equipment.
- Apply herbicides for the control of noxious weeds or fish toxicants for the control of fish diseases.
- Construct and repair nets, seines, and traps.
- Transport or transplant wildlife and fish.
- Trap and tag live game animals or fish.
- Coordinate and conduct field research with other agencies.
- Promote, sign-up, and monitor landowner contracts regarding conservation programs.
- Respond to and resolve landowner concerns with wildlife depredation policies and procedures.
- Supervise seasonal staff.

NOTE: The duties listed are not intended to be all-inclusive. Duties assigned any individual employee are at the discretion of the appointing authority.

WILDLIFE TECHNICIAN I

6001

GRADE H

LEVEL DEFINITION:

Work involves completing assigned duties in the operation of a wildlife or fish management area.

ADDITIONAL DUTIES PERFORMED AT THIS LEVEL:

- None.

MINIMUM QUALIFICATIONS:

Requires an associate degree in a vocational, biological or wildlife specialty, or a specialized vocational certificate, or two years work experience performing a variety of

wildlife duties. The hiring authority may identify specific degree requirements pertinent to the specific position at time of recruitment.

WILDLIFE TECHNICIAN II
GRADE I

6002

LEVEL DEFINITION:

Work at this level involves complex field and maintenance duties in the development of game and fish resources and assisting biologists with fish and wildlife projects.

ADDITIONAL DUTIES PERFORMED AT THIS LEVEL:

- Design, conduct, and oversee limnological and other biological fish and wildlife surveys and investigations; compile, analyze and interpret data.
- Represent agency at seminars and conferences.
- Ensure service contractors are providing services as specified in the contract.
- Research and prepare educational material on wildlife and fish resources.
- Prepare and give presentations to various organizations on biological findings.

MINIMUM QUALIFICATIONS:

Requires an associate degree in a vocational, biological, or wildlife specialty, or a specialized vocational certificate and two years of work experience, or four years of work experience performing a variety of wildlife duties. A bachelor's degree in a biological or wildlife specialty would normally provide the requisite knowledge and skills. The hiring authority may identify specific degree requirements pertinent to the specific position at time of recruitment.
