Community Dashboard Data Disclosure - Updated July, 2018

|  | Source of Data                         | Web link or Copyright   | Last update / date stamp          |
|--|--|---|-----------------------------------|
| Water utility rate                         | AE2S Nexus                             | www.ae2s.com / www.ae2snexus.com / Copyright 2017 © AE2S - All Rights Reserved. Information is provided on a voluntary basis by participating systems. There is a good cross section of ND communities included, but not all cities are in this data. You will readily note that the monthly utility costs among communities are highly variable. This can be attributed to a number of factors, such as water source, community size, presence/absence of a mechanical wastewater treatment plant, topography, condition of the existing infrastructure, and local policies relative to depreciation and capital improvement funding. The information presented can be used to determine where a community would rank based on a typical monthly residential utility bill with consumption of 6,000 gallons, bearing in mind this variability. | static spreadsheet, February 2018 |
| <b>Education</b>                           |  |   |                                   |
